

# HAWKE'S BAY PBN CONSULTATION - NZGS

November 2022

Tim Brazier  
Phil Rakena

3 November 2022

- PBN Implementation Project commenced in 2009 with NZQN
- Then rolled out to the international aerodromes (AA, WN, CH) over
- Regional aerodromes implementation started with HN, TG and RO in 2016
- The final regional aerodrome implementation was NS in 2018

## WHAT ABOUT NAPIER AND GISBORNE?

- Originally scheduled alongside NS
- Delayed in 2018 due to resourcing (NS, NR and GS too much at once)
- Delayed in 2019 due to NR Tower staffing
- Delayed in 2020 due to the first COVID lockdown
- Delayed in 2021 due to the ongoing COVID impact on the aviation industry

## CONCEPT OF OPERATIONS

### Nav Specification

- Enroute RNAV2, with surveillance
- SIDs/STARs RNP1 Regional / RNAV1 International (due 24/7 ATC surveillance)

Routes – separated city-pairs and, where possible, SIDs/STARs

Limited NDB/VOR routing retained for non-certified/contingencies

Priority to PBN traffic

SIDs and STARs issued early – pilots can plan ahead and optimise profiles

NZAA AD 2 - 33.4	AIP New Zealand	<b>AUCKLAND</b>
ELEV 23	CAT A,B,C,D	<b>RNAV STAR RWY 05R (4)</b>
NZAA		
AUCKLAND APPROACH: 124.3 129.6		TOWER: 118.7 120.95 ATIS: 127.8 127.0
	<b>Navigation requirement: RNAV 1 GNSS required</b>	<b>RWY 05R</b> UKAPA TWO DELTA ARRIVAL – RNAV (UKAPA2D) Expect radar vectors when M106 active TRANSITIONS: PERAS – From PERAS track 128° (G591) to UKAPA

	AIP New Zealand	NZPM AD 2 - 33.6
ELEV 151	CAT A,B,C,D	<b>PALMERSTON NORTH</b>
NZPM		<b>RNP STAR RWY 25 (3)</b>
OHAKEA APPROACH: 125.1 128.5 123.2 263.4		PALMERSTON TOWER: 120.6 UNATTENDED: 120.6
ATIS: 129.7		
	IDLUR 539 49 24 E175 33 47	<b>Navigation requirement: RNP 1</b>

### 10.3 Granting of Priorities

10.3.1 Priority will be given to the aircraft first able to use the airspace or manoeuvring area; **except:**

- where a more orderly flow or a significant economic benefit for a number of other aircraft would result by deferring this priority;
- where a significantly greater economic penalty to another aircraft would result e.g. by permitting a light aircraft to operate ahead of a large jet aircraft;
- aircraft operating in the normal pattern will be given priority over aircraft desiring to operate in conflicting patterns;
- where a training instrument approach has been approved, normal priority will be given to the aircraft from the time it commences final approach; and
- where prior arrangement has been made for flight inspection checks and a priority has been predetermined.
- where PBN has been implemented, priority may be given to PBN operations over non-PBN operations.

# Hawke's Bay PBN - ConOps

## BENEFITS & DOWNSIDES

- Reduce delays, improve capacity and increase or maintain safety
- Separated inbounds/outbounds
- Consistent and predictable
- But:
  - Flexibility reduces, for less complex, simpler, safer IFPS
  - Mixed-mode RNP vs VOR-based IFPs adds complexity
  - Track miles *may* increase

NZAA AD 2 - 33.4	AIP New Zealand	<b>AUCKLAND</b>
ELEV 23	CAT A,B,C,D	<b>RNAV STAR RWY 05R (4)</b>
NZAA

### 10.3 Granting of Priorities

10.3.1 Priority will be given to the aircraft first able to use the airspace or manoeuvring area; **except:**

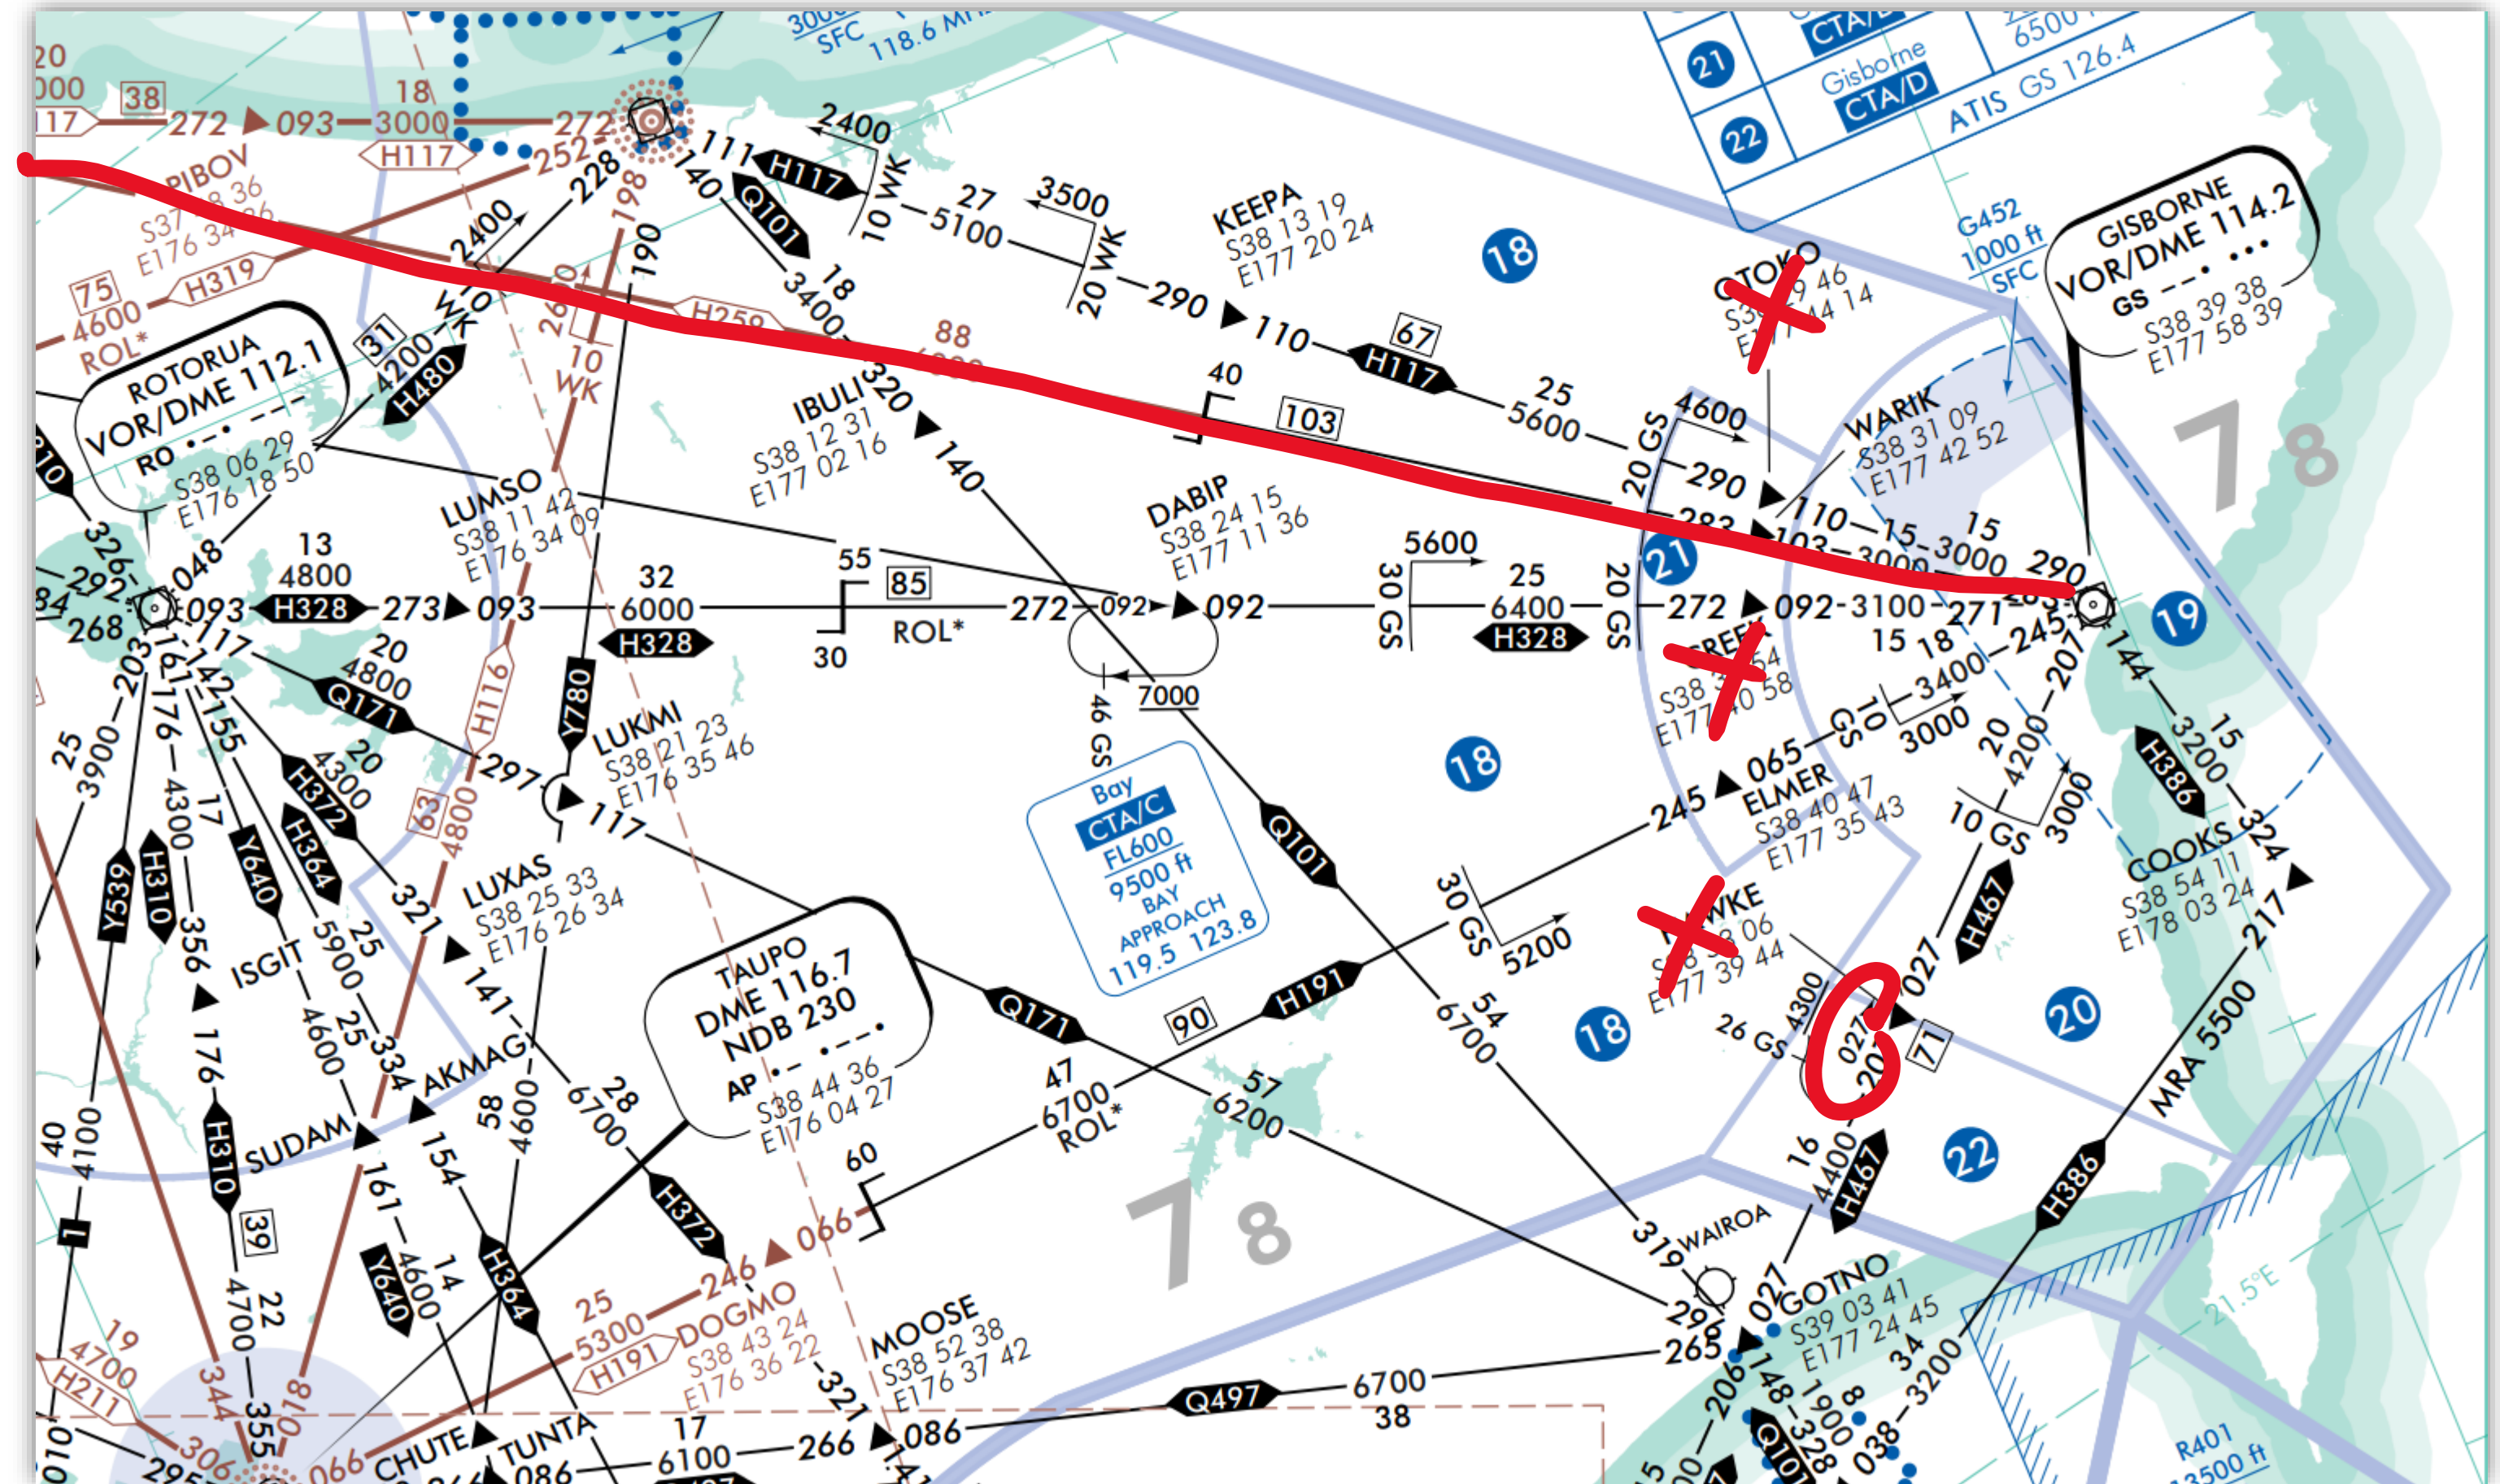

- where a more orderly flow or a significant economic benefit for a number of other aircraft would result by deferring this priority;
- where a significantly greater economic penalty to another aircraft would result e.g. by permitting a light aircraft to operate ahead of a large jet aircraft;
- aircraft operating in the normal pattern will be given priority over aircraft desiring to operate in conflicting patterns;
- where a training instrument approach has been approved, normal priority will be given to the aircraft from the time it commences final approach; and
- where prior arrangement has been made for flight inspection checks and a priority has been predetermined.
- where PBN has been implemented, priority may be given to PBN operations over non-PBN operations.

# Hawke's Bay PBN – Gisborne Routes

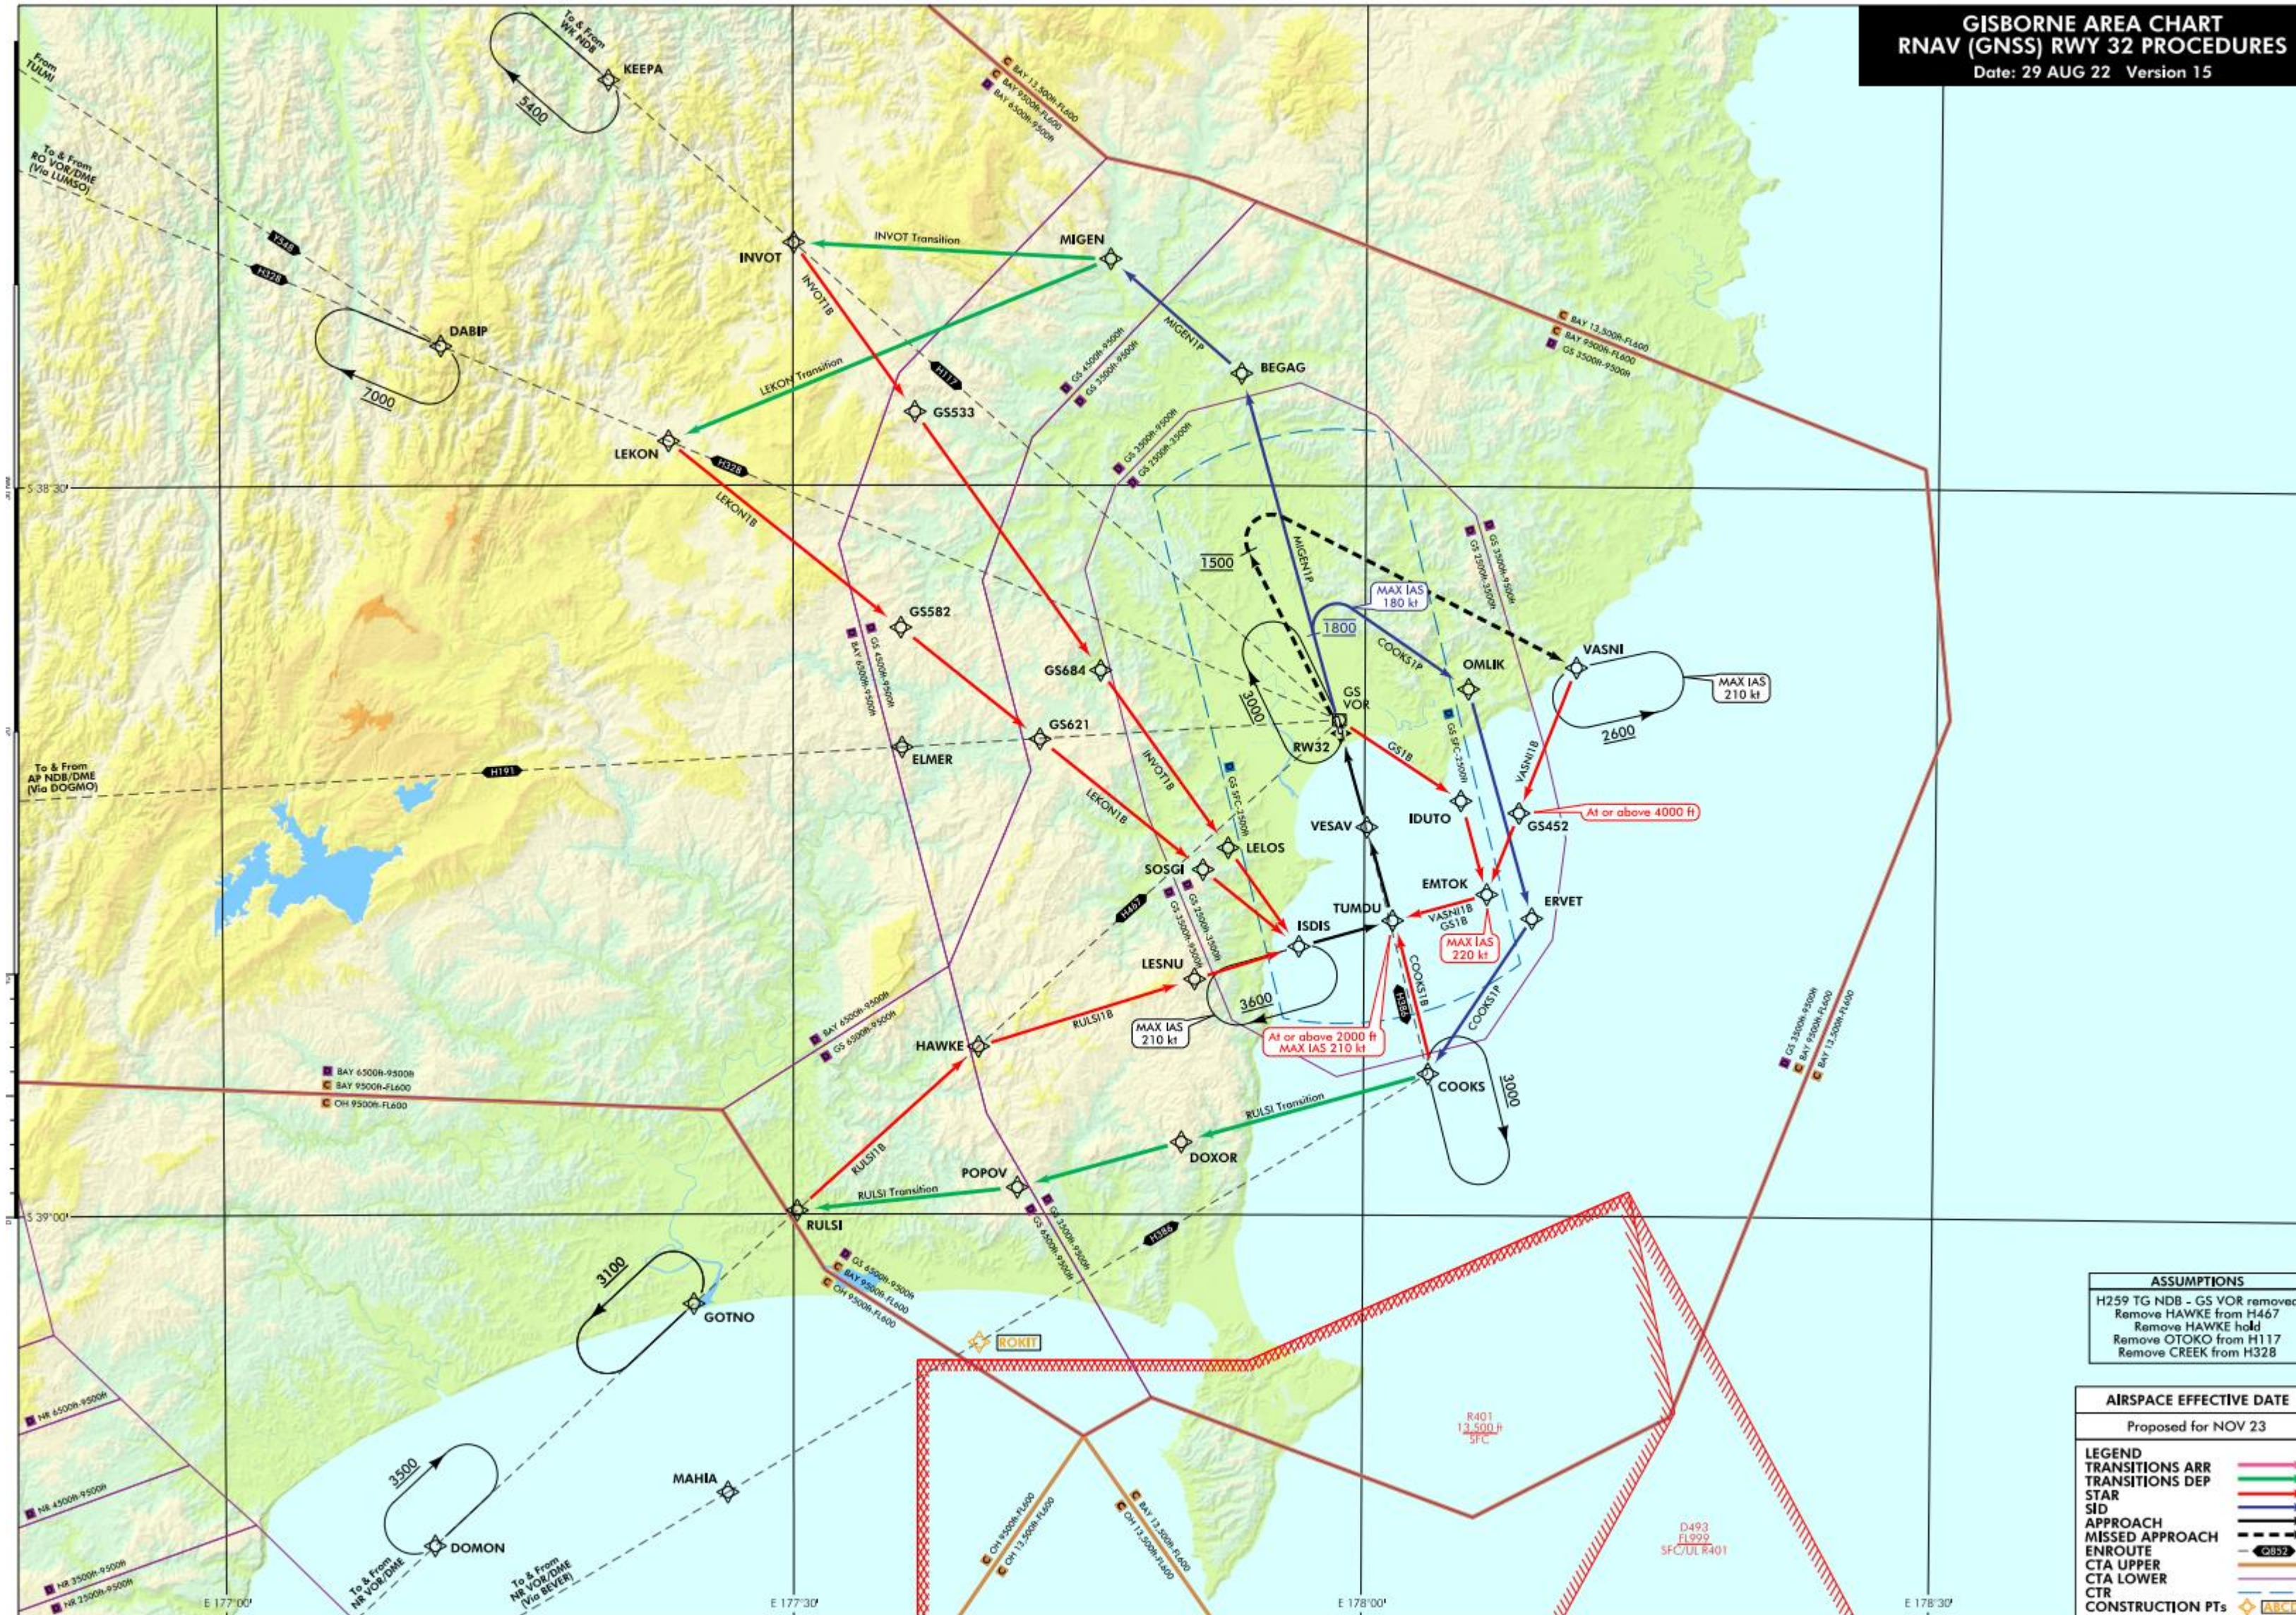

## ASSUMPTIONS

- H259 TG NDB - GS VOR removed
- Remove HAWKE from H467
- Remove HAWKE hold
- Remove OTOKO from H117
- Remove CREEK from H328

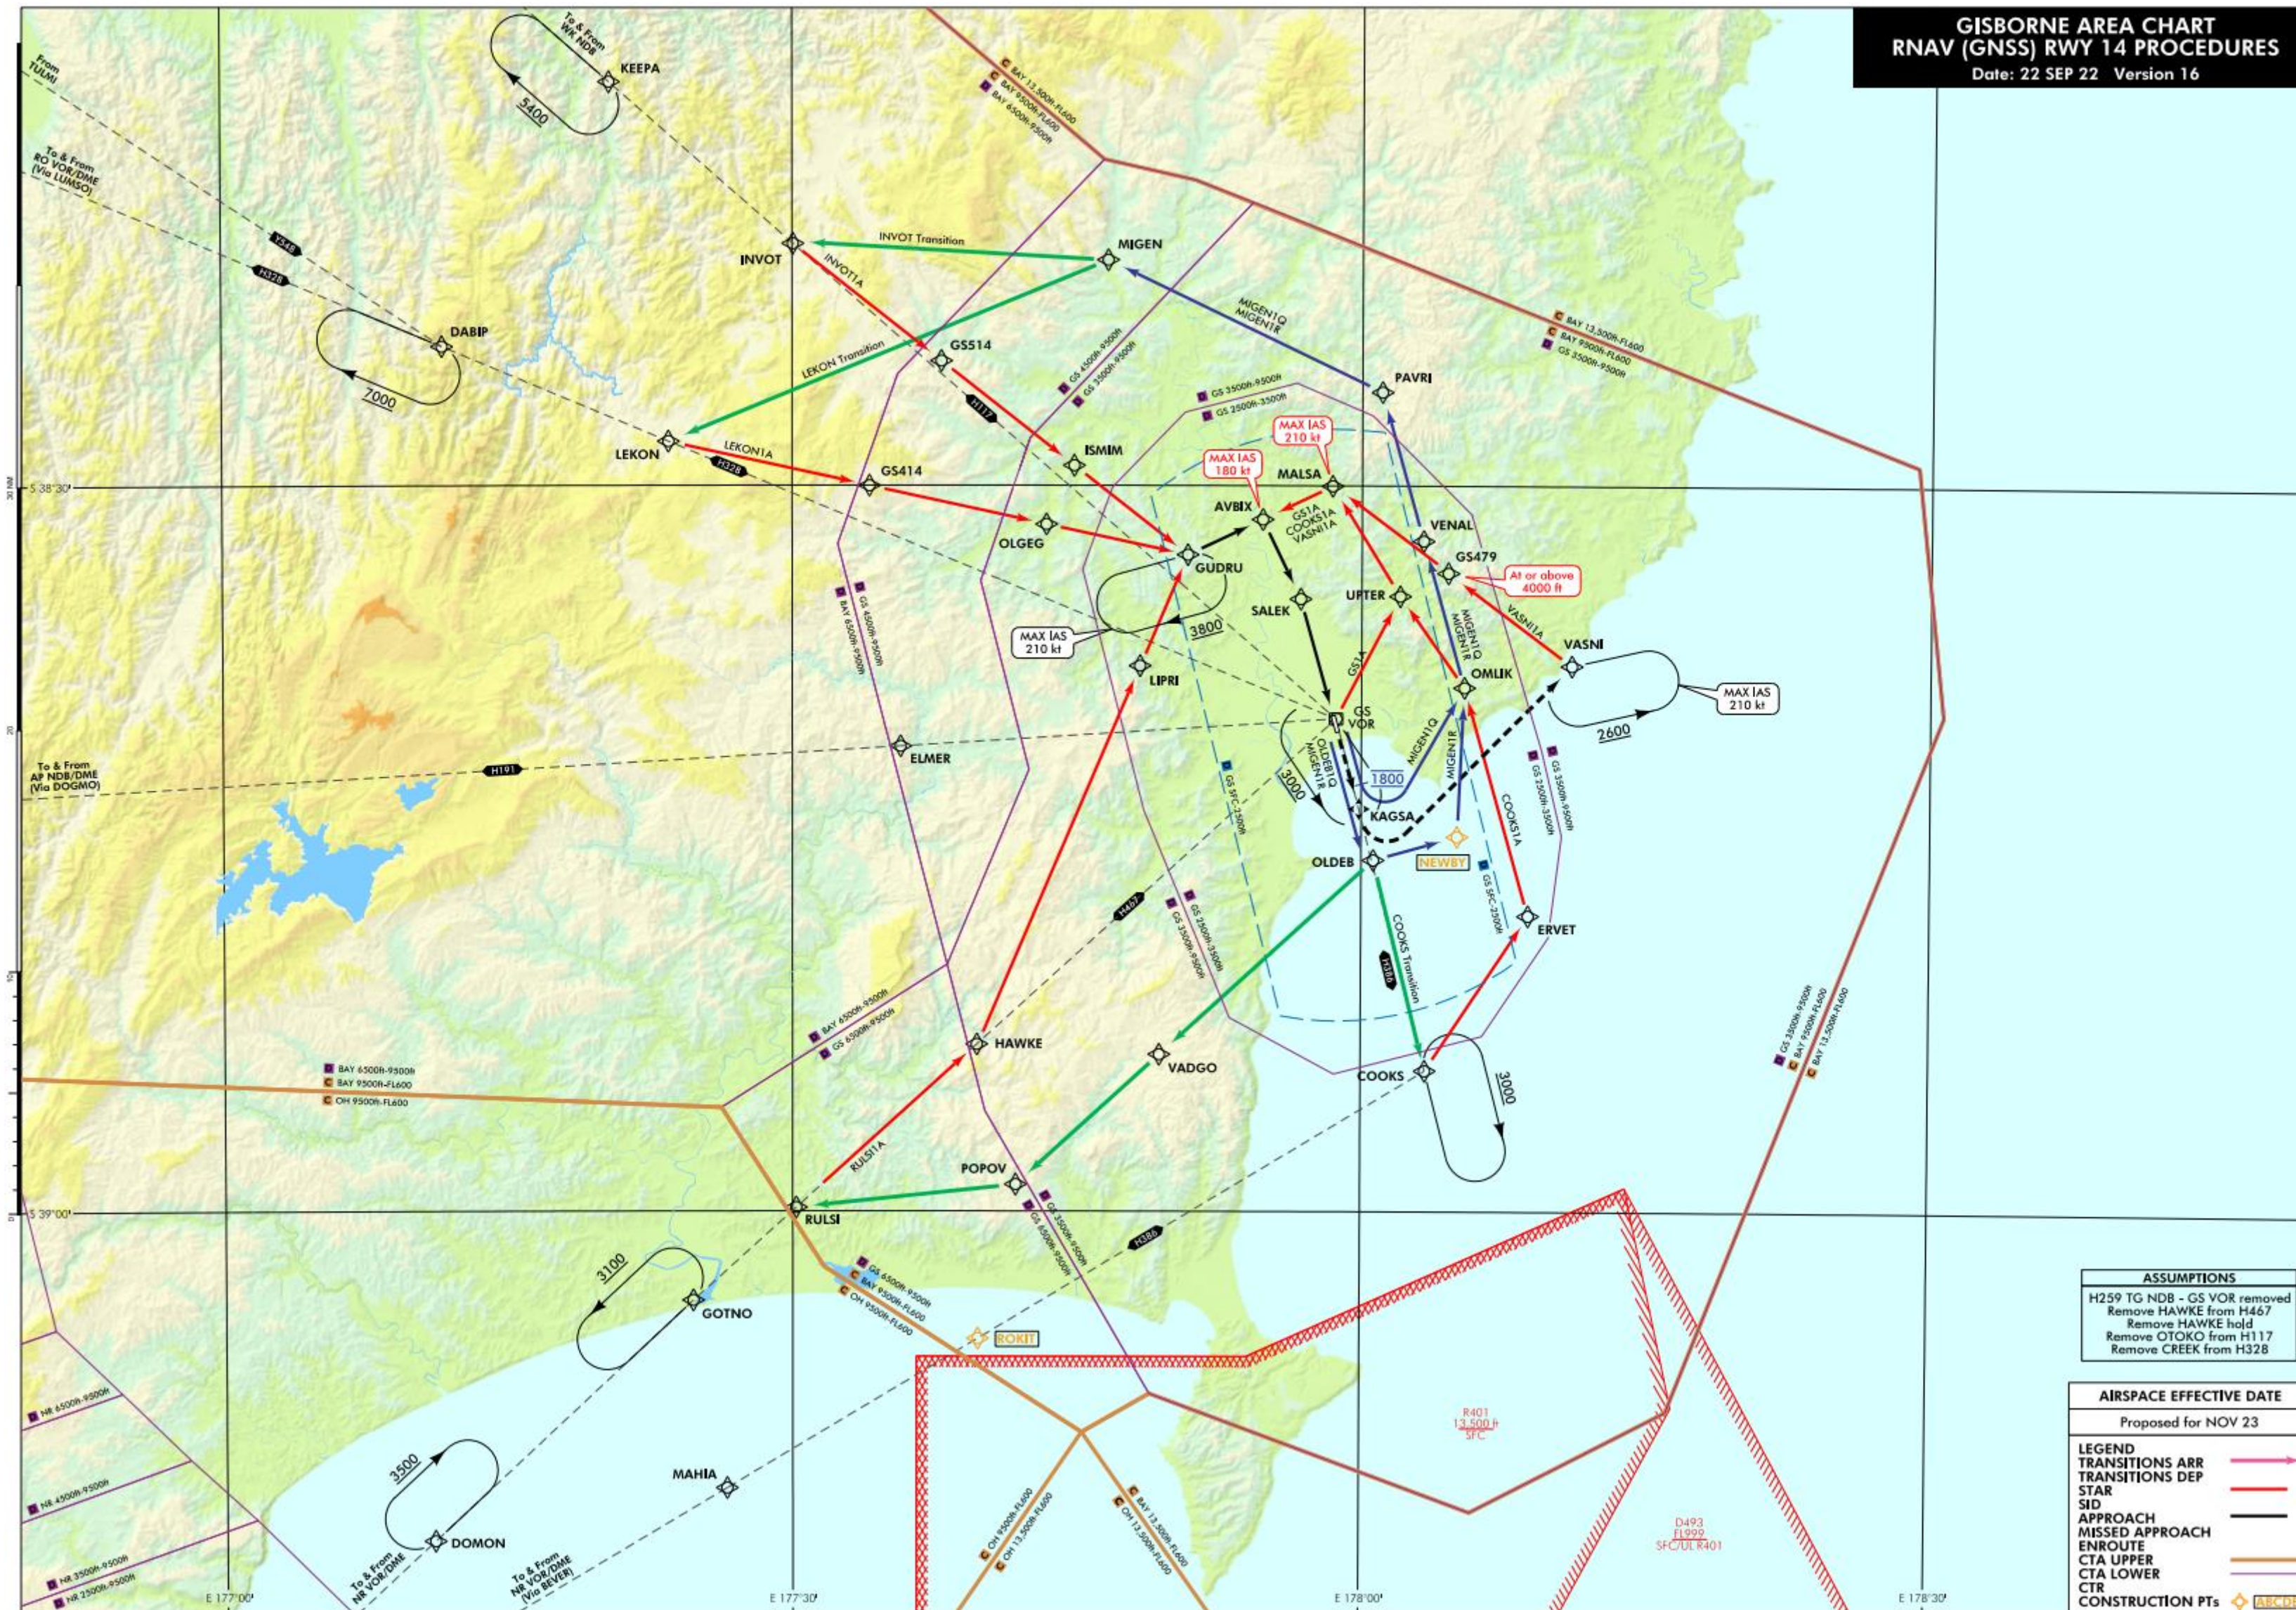

- Direct TG – GS track unnecessary, via KEEPA or DABIP available
- HAWKE hold would require large amounts of airspace to contain
- OTOKO and CREEK replaced by DME distance steps

# Hawke's Bay PBN – Gisborne RW32

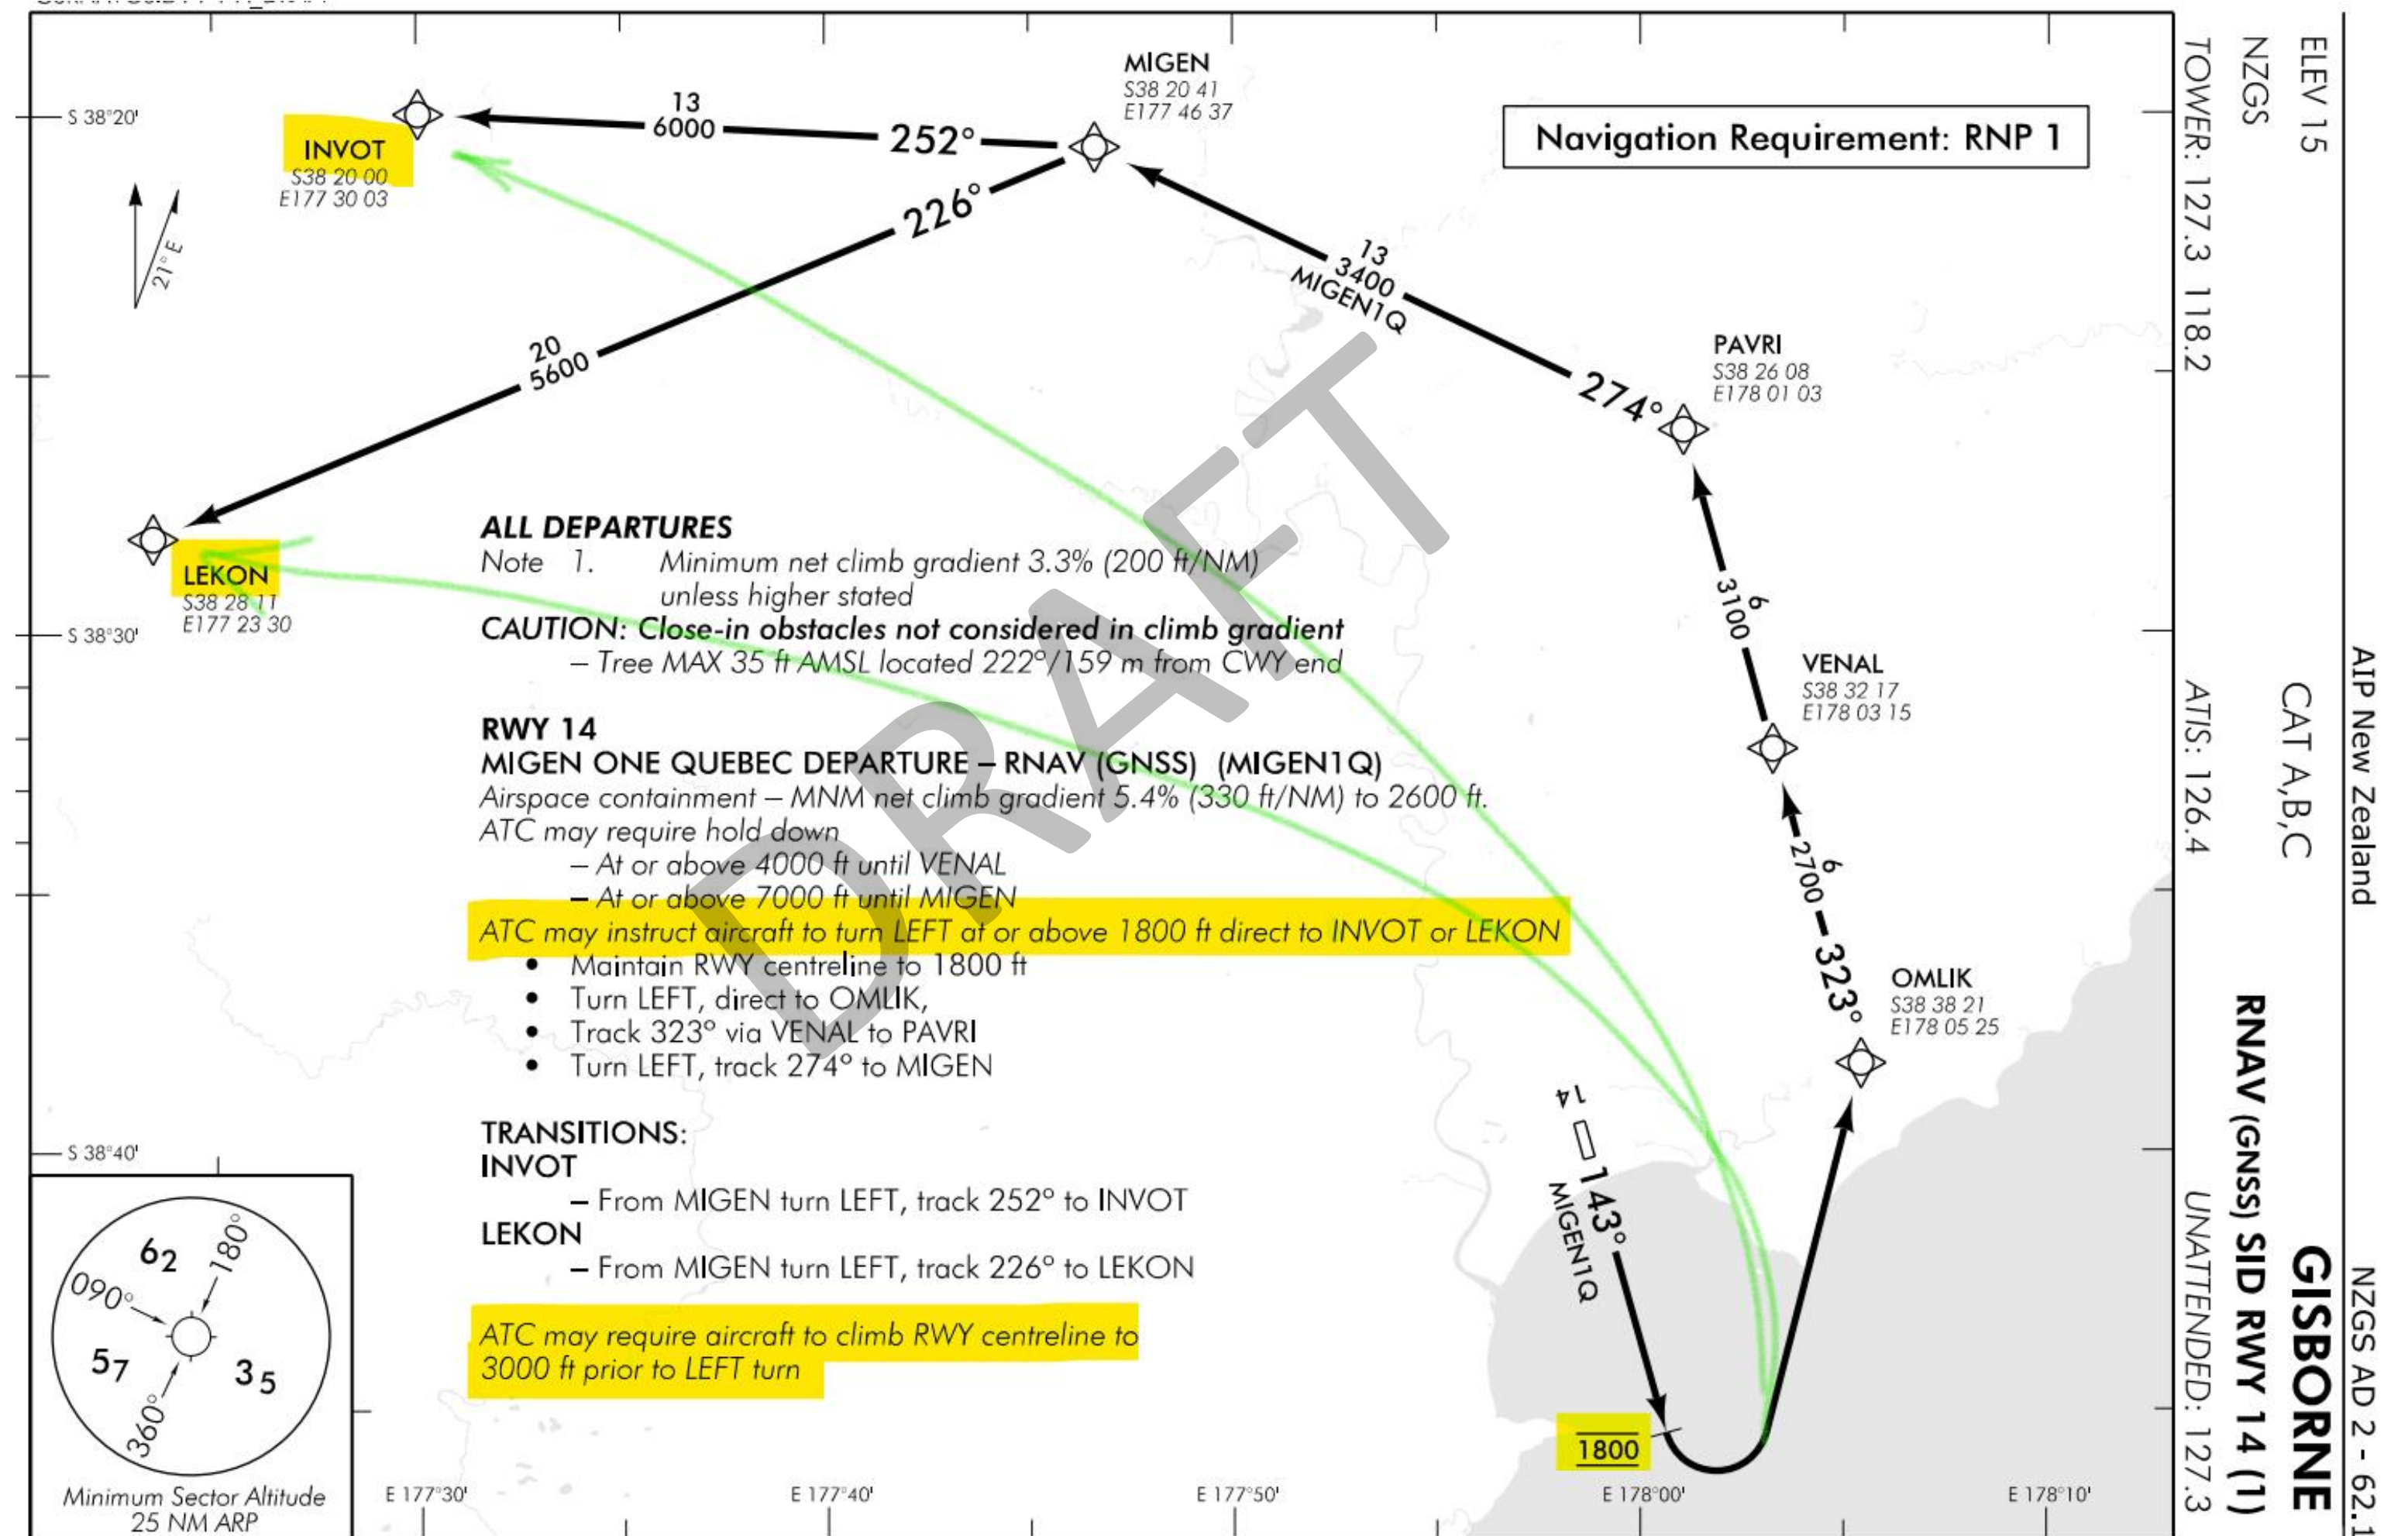

# Hawke's Bay PBN – Gisborne RW14

# Hawke's Bay PBN – NZGS SID Direct tracking

- Where deemed advantageous, direct tracking will be built into SIDs
- Allows ATC to shorten track miles when a conflict is resolved e.g. once vertical separation is in place
- Direct tracking has been assessed for both airspace containment and obstacles
- Retains consistency and predictability

# Hawke's Bay PBN – Gisborne IFPs amended

## IFPs to be re-assessed:

- VOR/DME missed approaches (for airspace containment)
- Conventional departures (for airspace containment)
- Evaluated Climb Sector (for airspace containment)

## IFPs to be added:

- VASNI hold – as arrival, to join either arc from the east

## IFPs to be deleted:

- RW14 GANET ONE
- RW32 CITY THREE

**NZGS AD 2 - 62.2** AIP New Zealand **GISBORNE**  
 ELEV 15 CAT A,B,C **SID RWY 32**  
 NZGS TOWER: 127.3 118.2 ATIS: 126.4 UNATTENDED: 127.3

**Outside ATC hours of service**

- Use 127.3 MHz and unattended aerodrome RTF procedures.
- Departing aircraft contact Napier Tower 125.6 MHz, or outside Napier TWR hours Christchurch Information 125.6 MHz or 0800 626 756 (landline users only) or (03) 358 1509, for clearance and traffic information prior to entering IMC or controlled airspace.

**ALL DEPARTURES**

1. Minimum net climb gradient 3.3% (200 ft/NM) unless higher stated
2. Minimum turn altitude 500 ft unless higher stated
3. EVALUATED CLIMB SECTOR R060 through south to R320 within 25 NM – MNM net climb gradient 4.2% (260 ft/NM) to MSA
4. **CAUTION: Close in obstacles not considered in climb gradient**  
 – Trees MAX 114 ft AMSL located in sector 320° - 360° between 390 m and 960 m from CWY end

**CRAY THREE DEPARTURE (CRA3)**  
 To KEEPA, TG, RO, AP, HAWKE, COOKS, GOKAG  
 MNM net climb gradient 4.2% (260 ft/NM) to MSA

- Turn LEFT, intercept track

**PAUA THREE DEPARTURE (PUA3)**  
 To AP, HAWKE, COOKS, GOKAG  
 MNM net climb gradient 4.0% (250 ft/NM) to MSA

- Maintain RWY centreline to MNM 1500 ft
- Turn LEFT, intercept track

**CITY THREE DEPARTURE (CIT3)**  
 To all destinations  
 MNM net climb gradient 4.0% (250 ft/NM) to 2500 ft

- Maintain RWY centreline to MNM 1500 ft
- Turn RIGHT, track via GS VOR, intercept track

Changes from 12 AUG 21: Outside ATC hours of service notes updated, all departures note 3.

AIP New Zealand **NZGS AD 2 - 62.1**  
 ELEV 15 CAT A,B,C **GISBORNE**  
 NZGS TOWER: 127.3 118.2 ATIS: 126.4 UNATTENDED: 127.3 **SID RWY 14**

**Outside ATC hours of service**

- Use 127.3 MHz and unattended aerodrome RTF procedures.
- Departing aircraft contact Napier Tower 125.6 MHz, or outside Napier TWR hours Christchurch Information 125.6 MHz or 0800 626 756 (landline users only) or (03) 358 1509, for clearance and traffic information prior to entering IMC or controlled airspace.

**ALL DEPARTURES**

1. Minimum net climb gradient 3.3% (200 ft/NM) unless higher stated
2. Minimum turn altitude 500 ft unless higher stated
3. EVALUATED CLIMB SECTOR R060 through south to R320 within 25 NM – MNM net climb gradient 4.2% (260 ft/NM) to MSA
4. **CAUTION: Close in obstacles not considered in climb gradient**  
 – Pine tree MAX 44 ft AMSL located 222° and 170 m from CWY end

**NICK THREE DEPARTURE (NIC3)**  
 To HAWKE, AP, RO, TG, KEEPA  
 MNM net climb gradient 4.0% (250 ft/NM) to MSA

- Turn RIGHT, intercept track

**NUHAKA THREE DEPARTURE (NUH3)**  
 To HAWKE, AP, RO, TG, KEEPA

- Maintain RWY centreline to MNM 2300 ft
- Turn RIGHT, intercept track

**GANET ONE DEPARTURE (GAN1)**  
 To COOKS, GOKAG

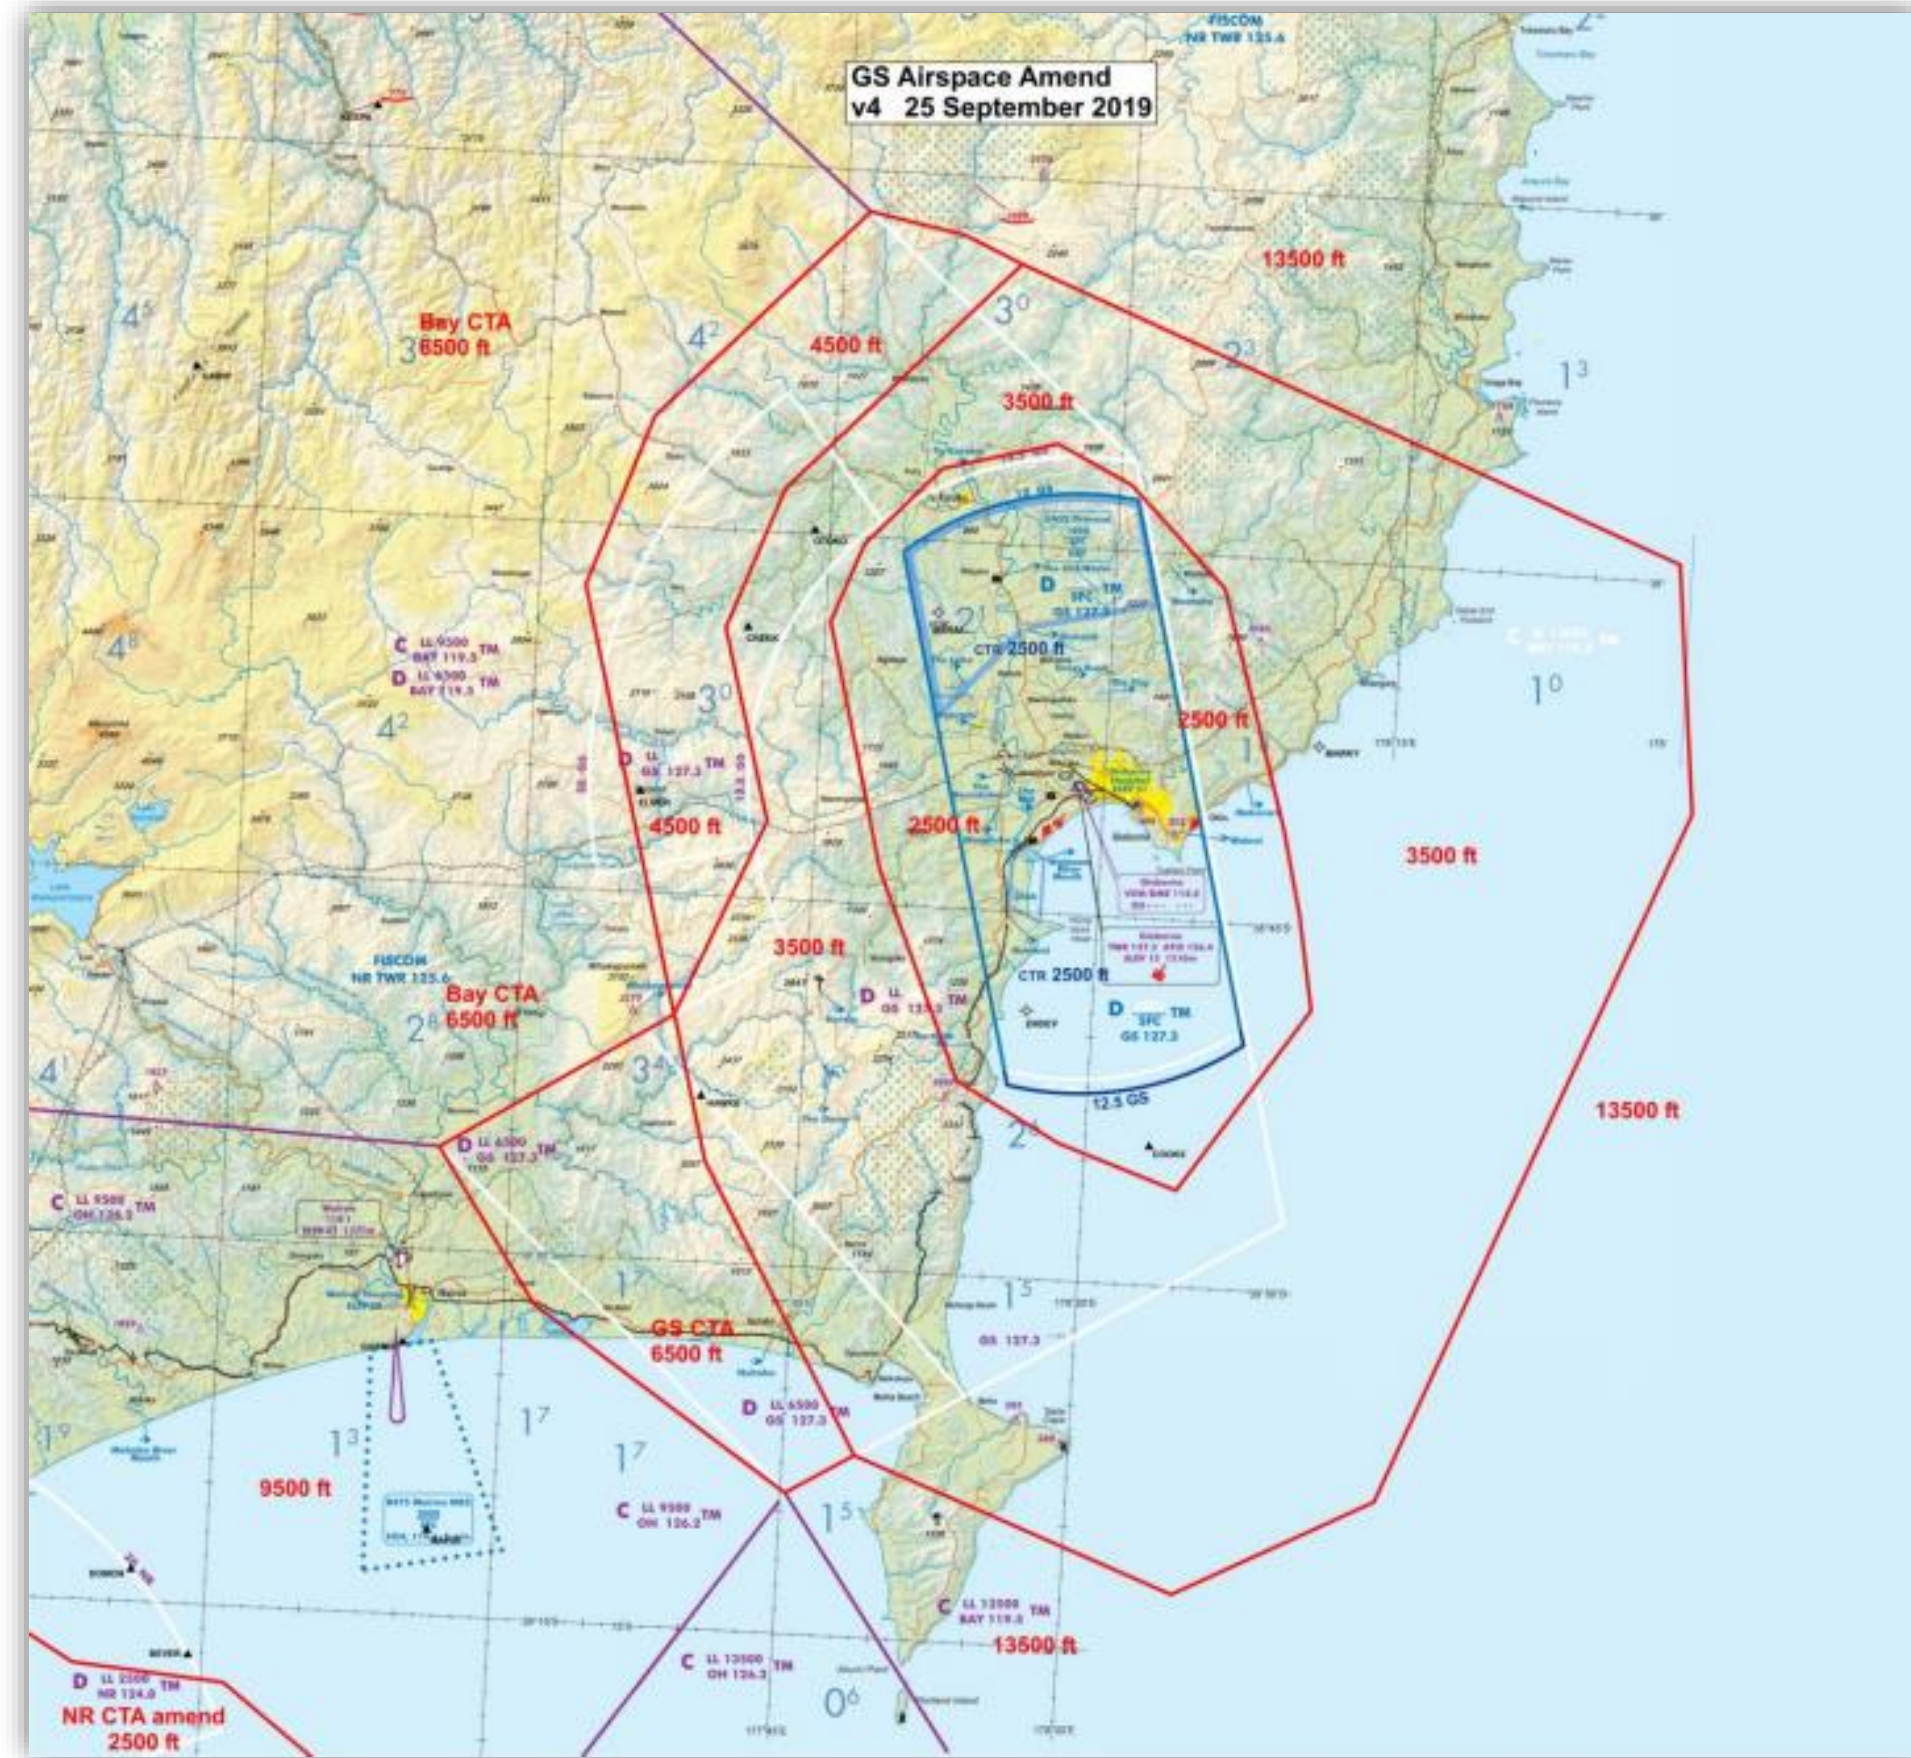

- To COOKS – Intercept track
- To GOKAG – Maintain RWY centreline to MNM 1100 ft, turn LEFT, intercept track

**TUNA TWO DEPARTURE (TUN2)**  
 To AP, RO, TG, KEEPA  
 (Tracking on R005 may not be entirely contained within controlled airspace)

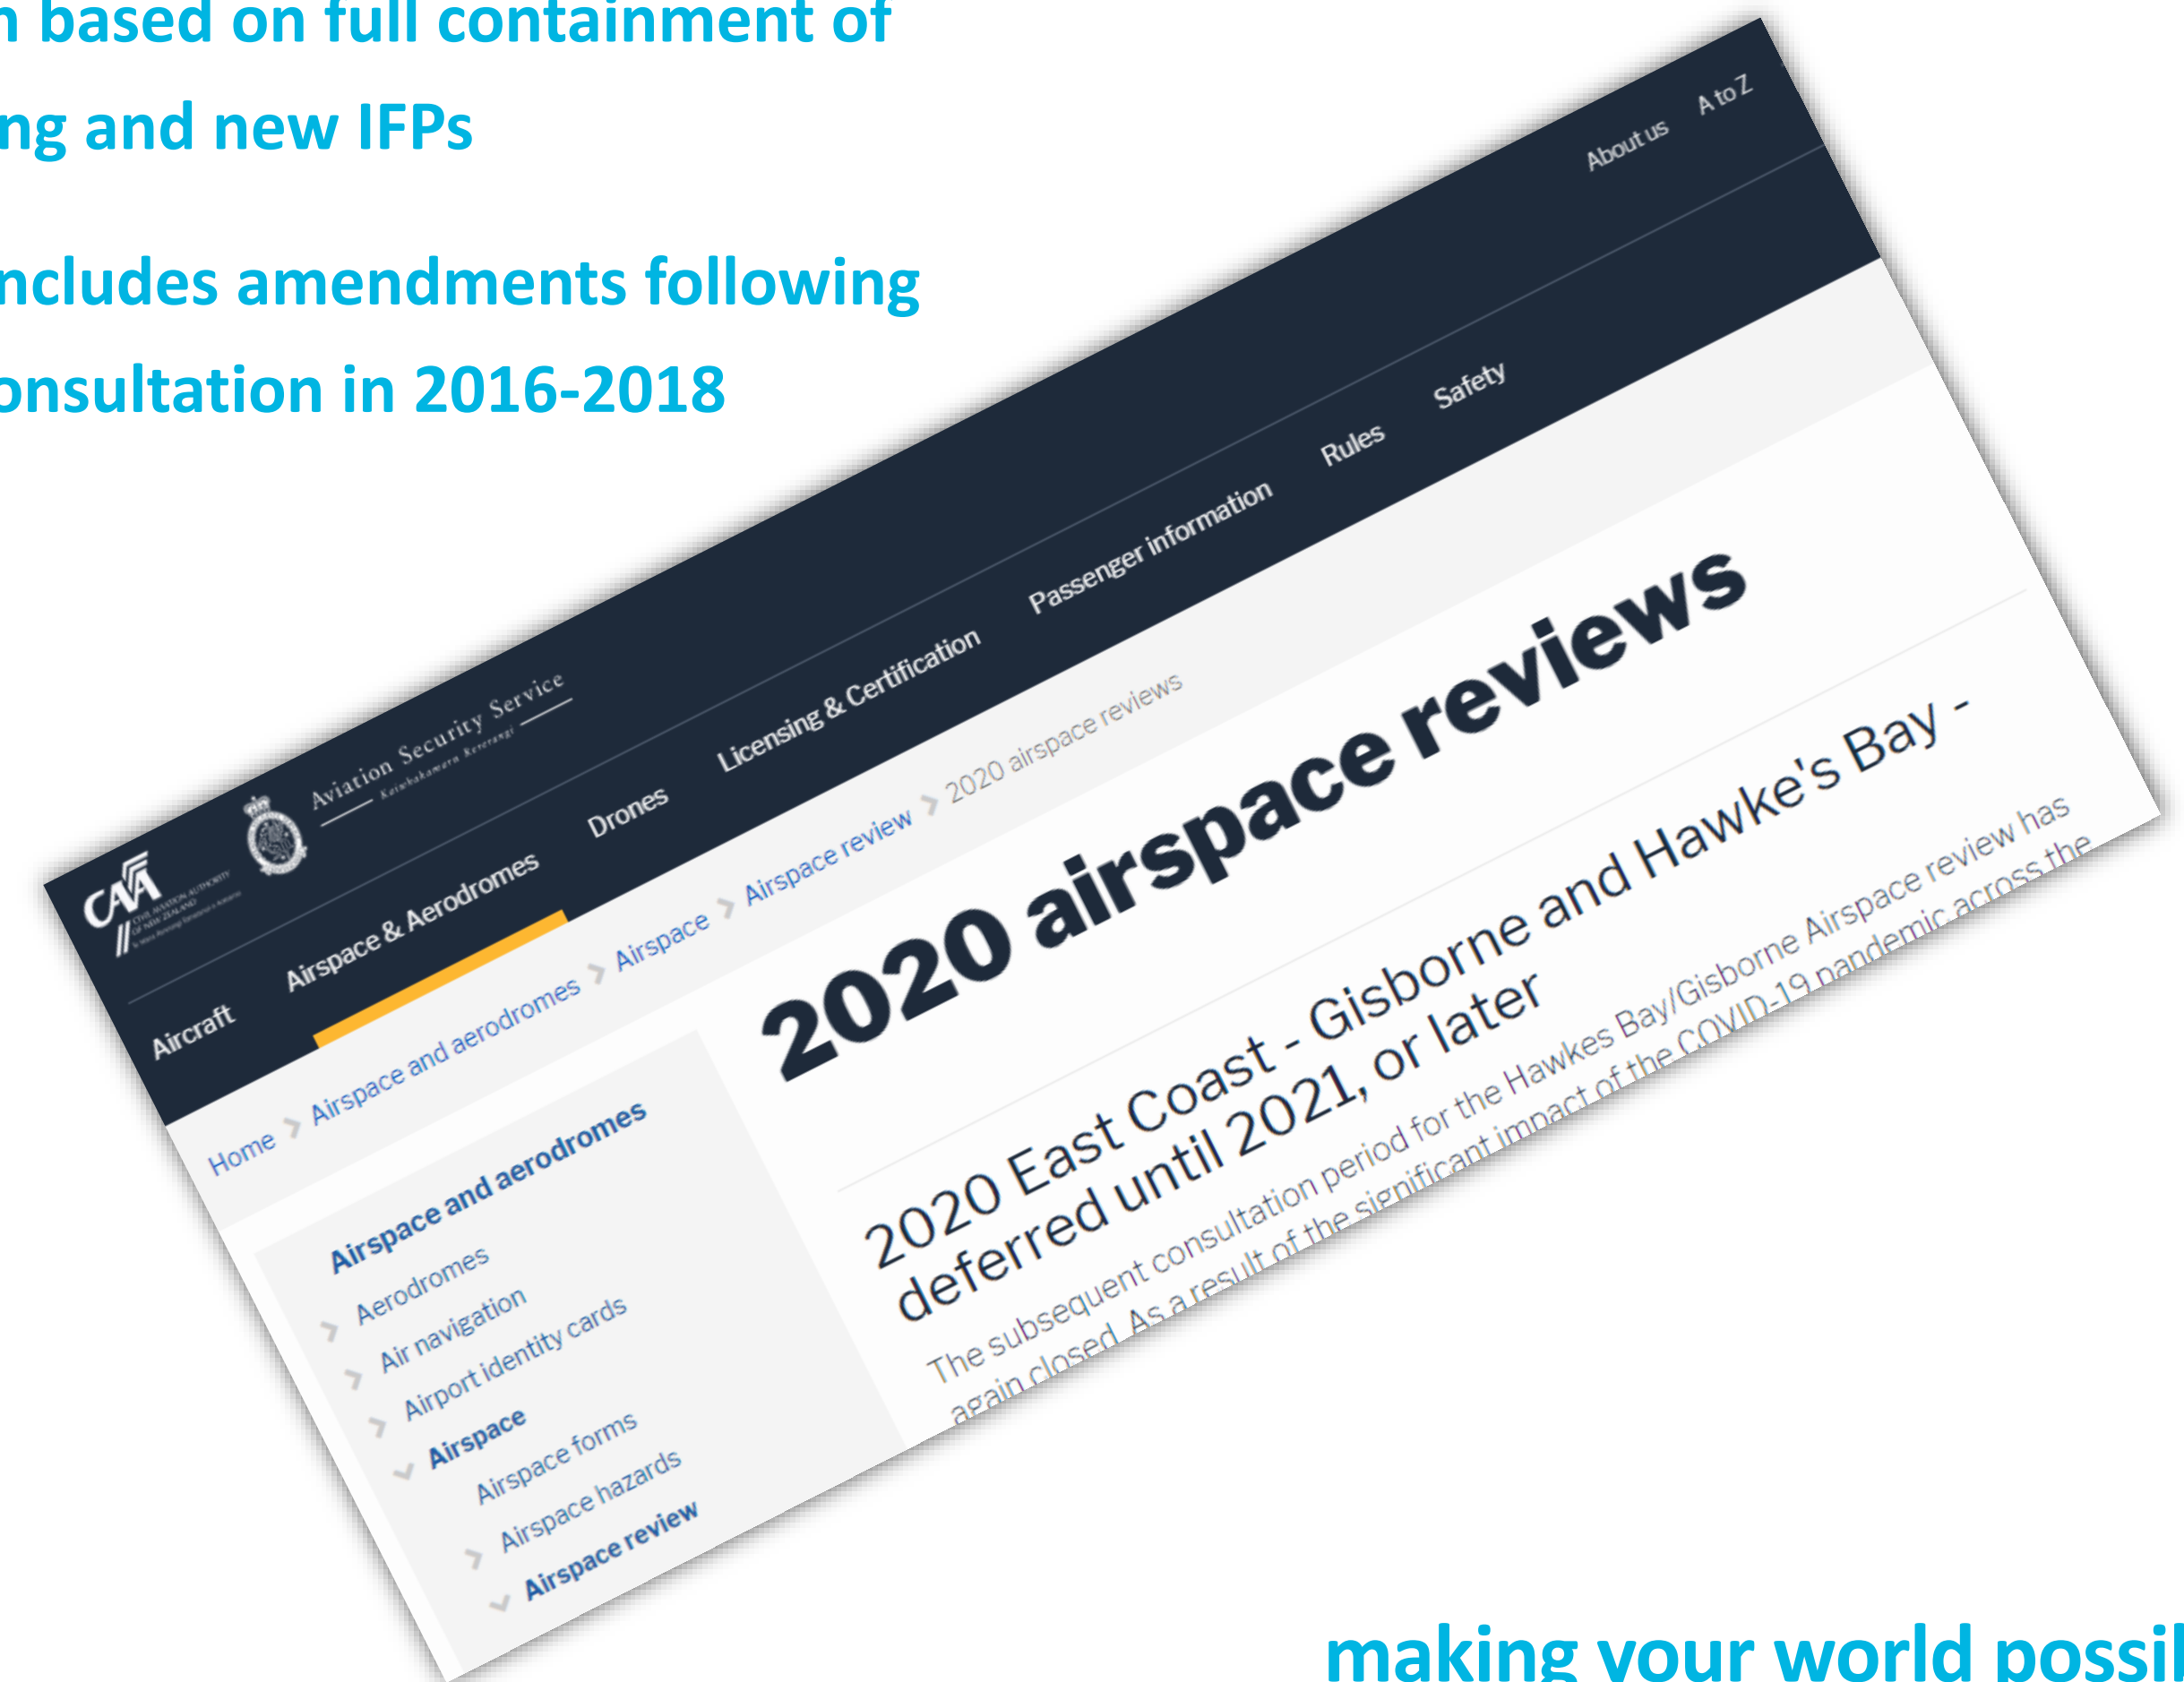

- Maintain RWY centreline to MNM 1100 ft
- Turn LEFT, intercept R005
- At MNM 4000 ft, turn LEFT, intercept track

GSSD14-1

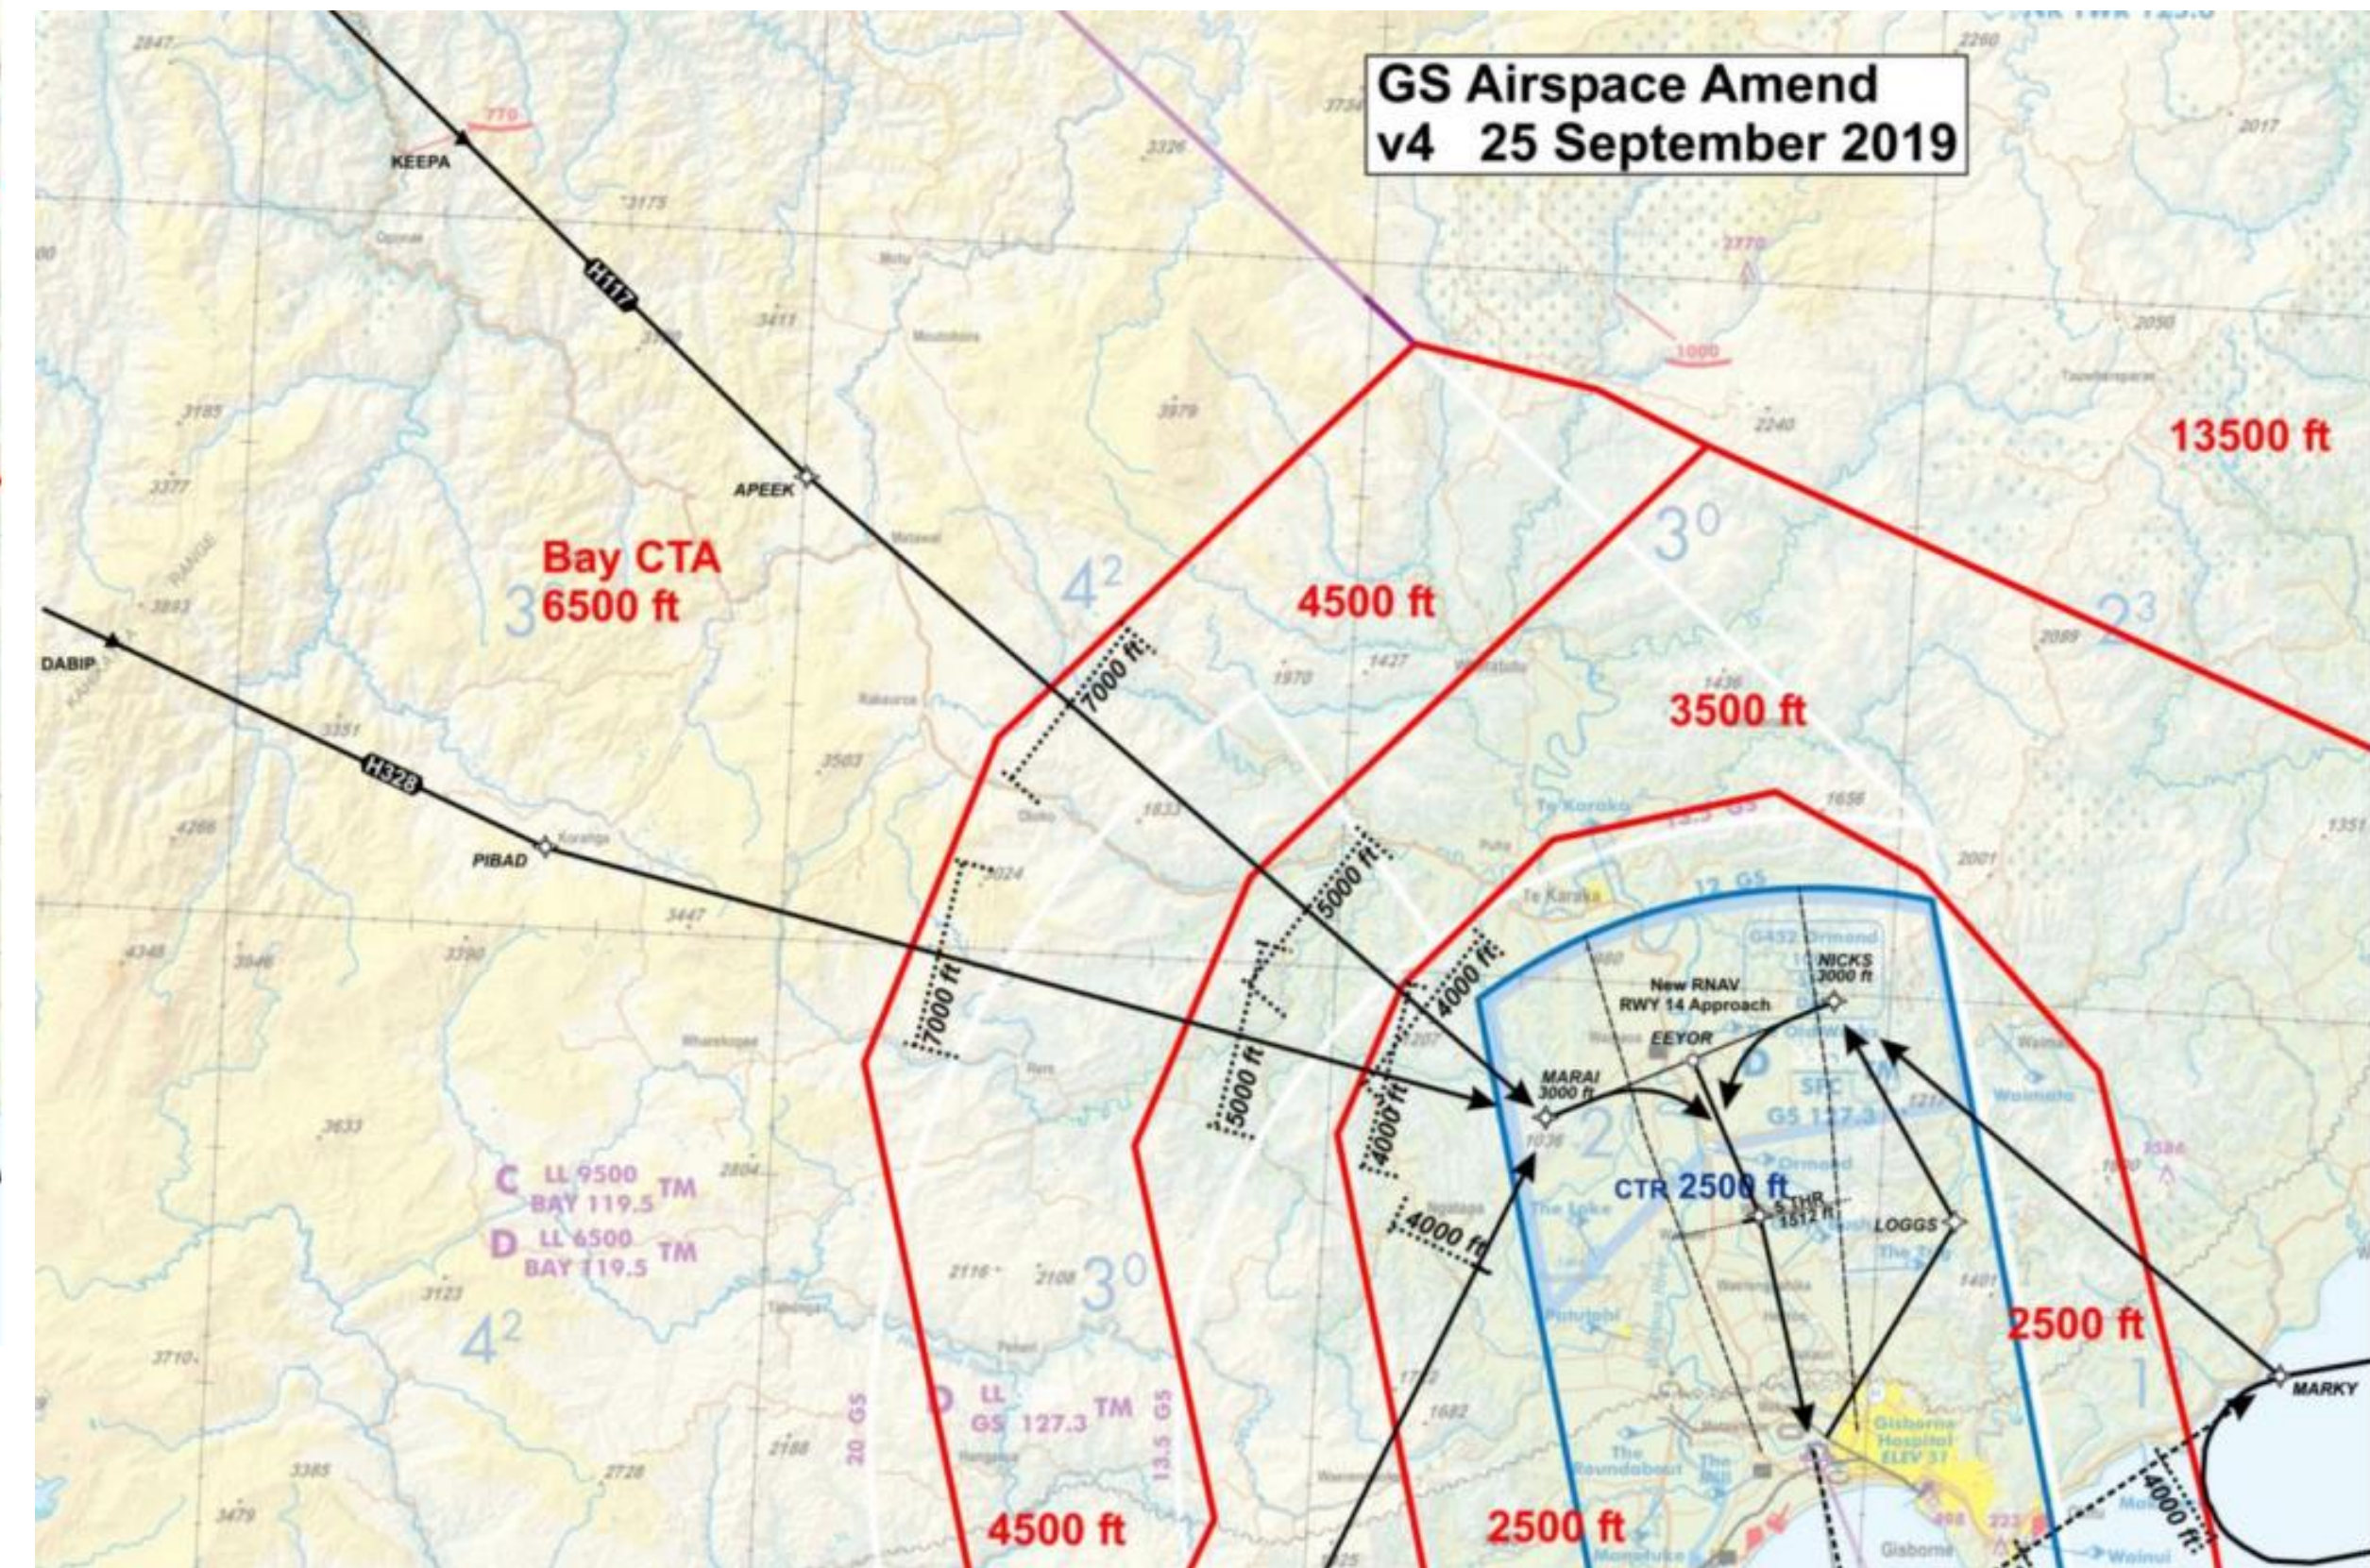

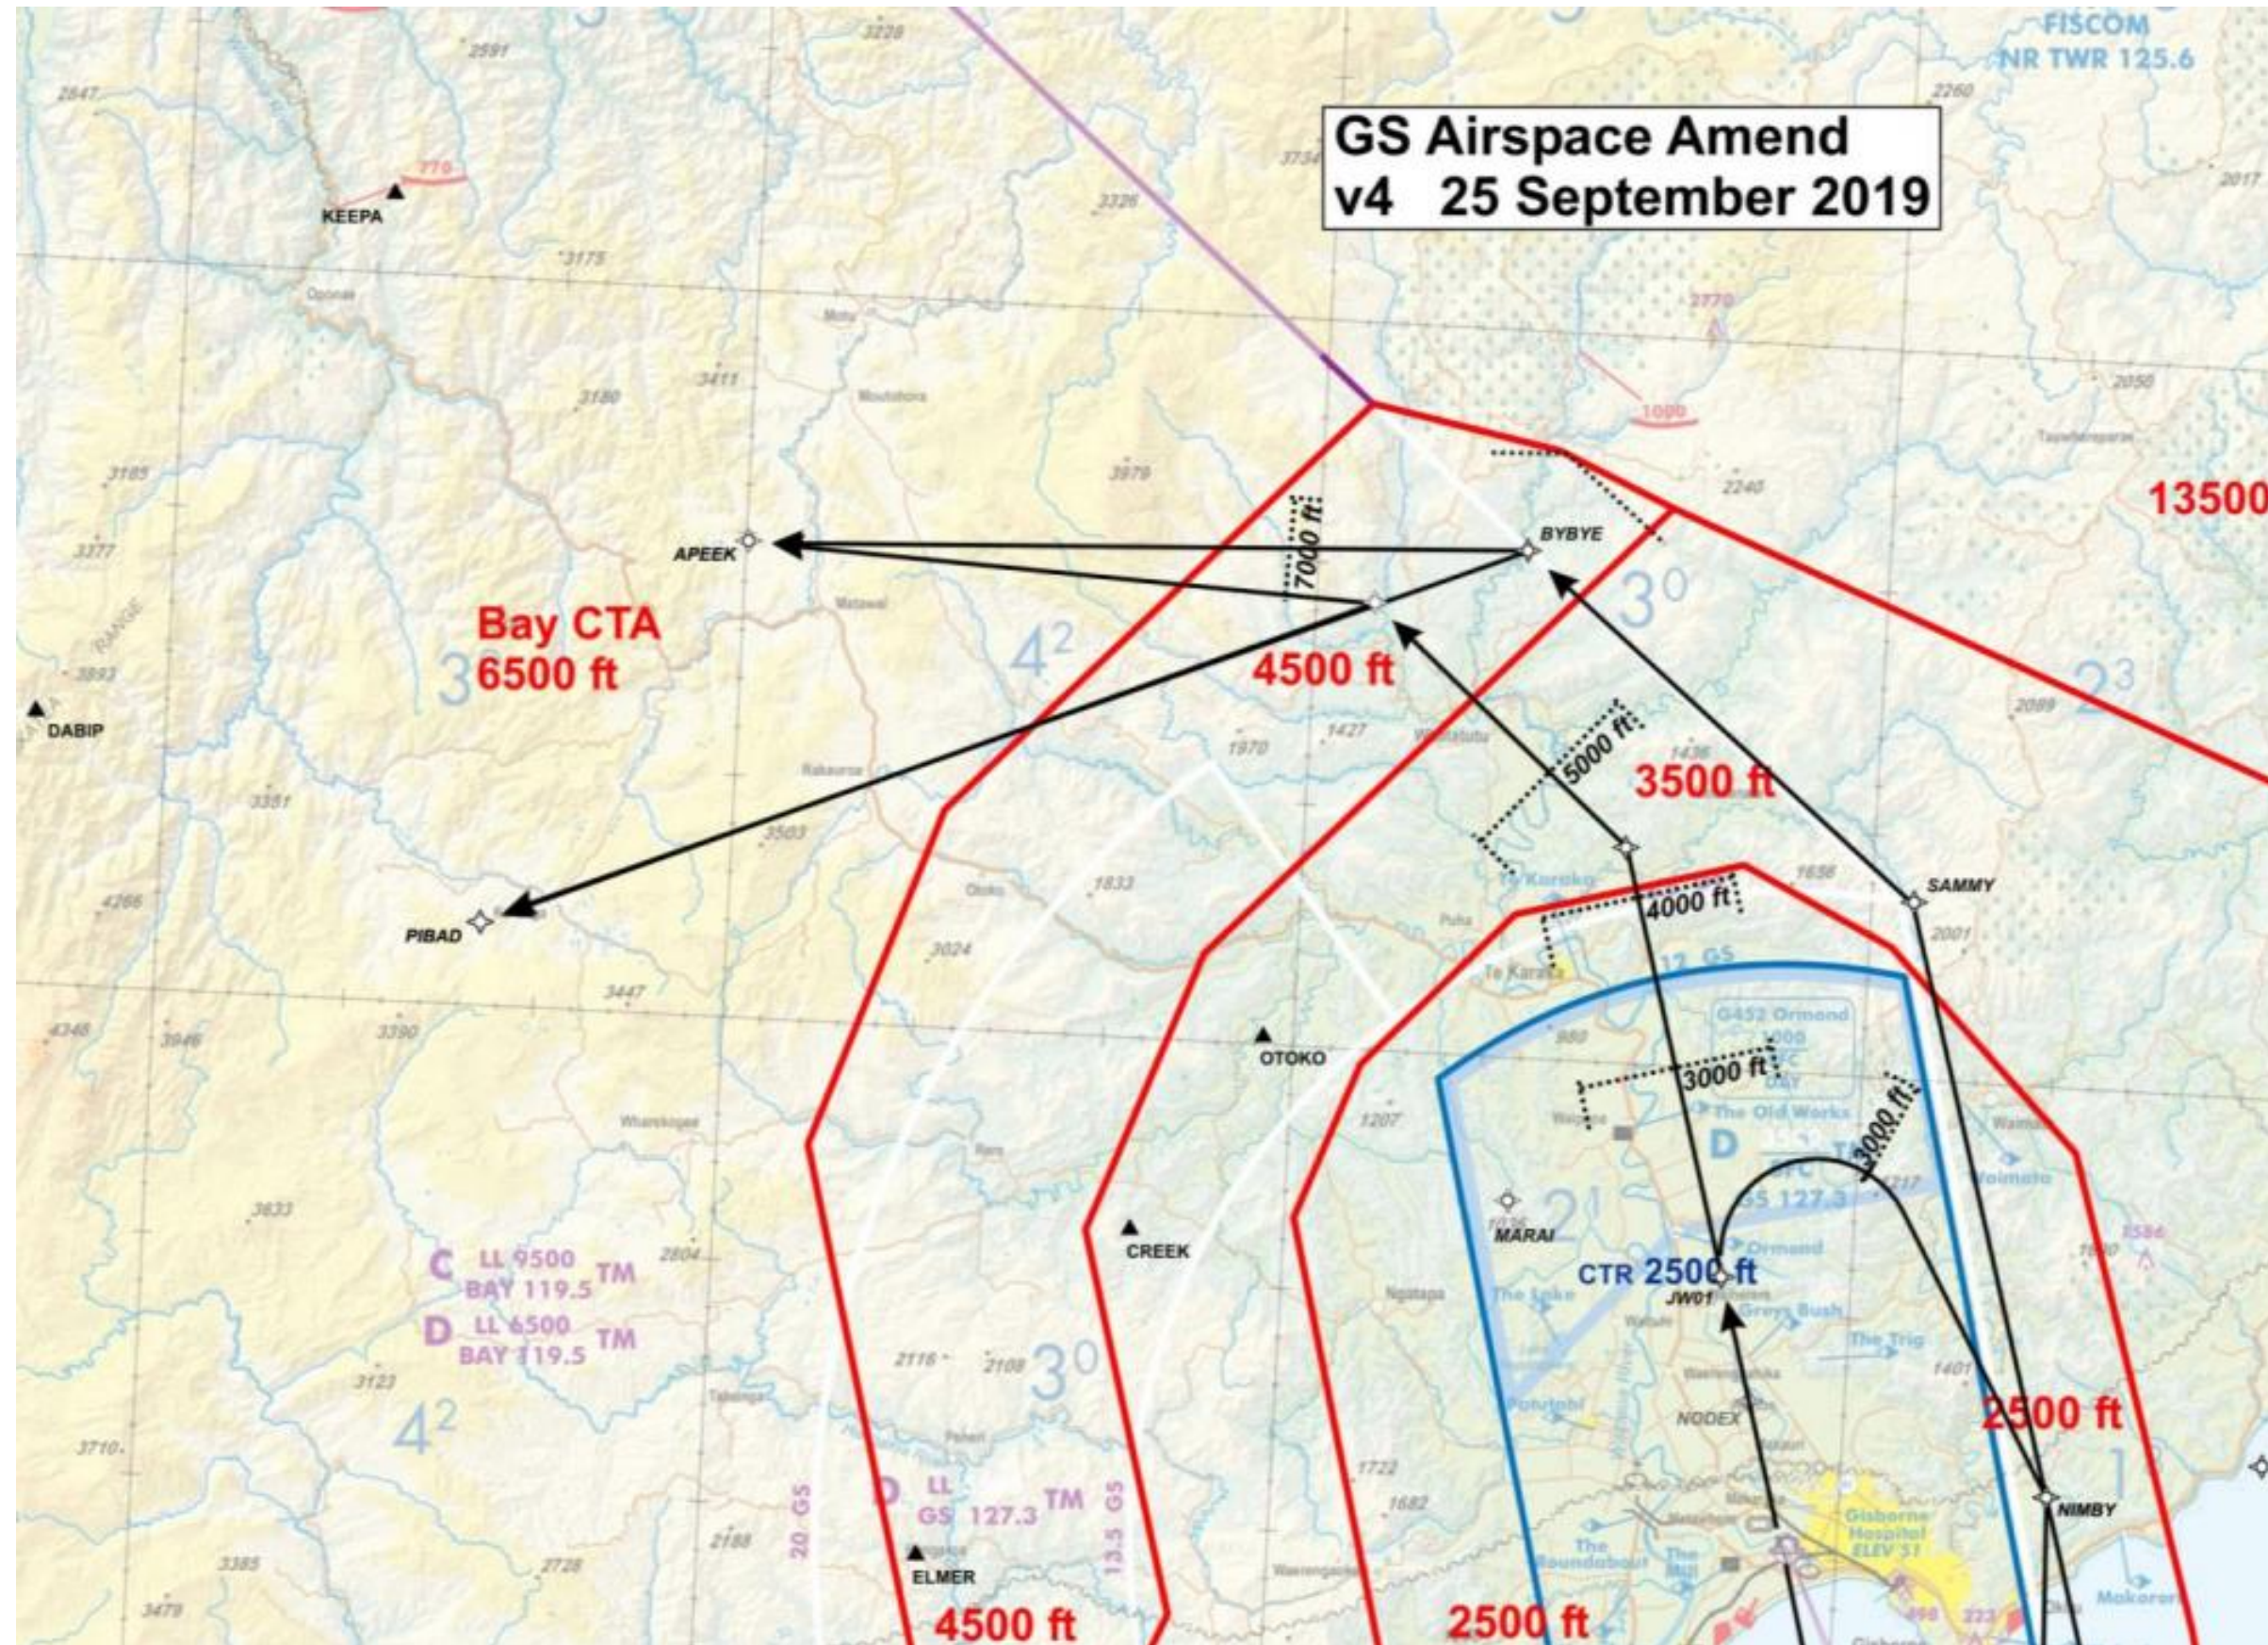

# Hawke's Bay PBN – Gisborne Airspace

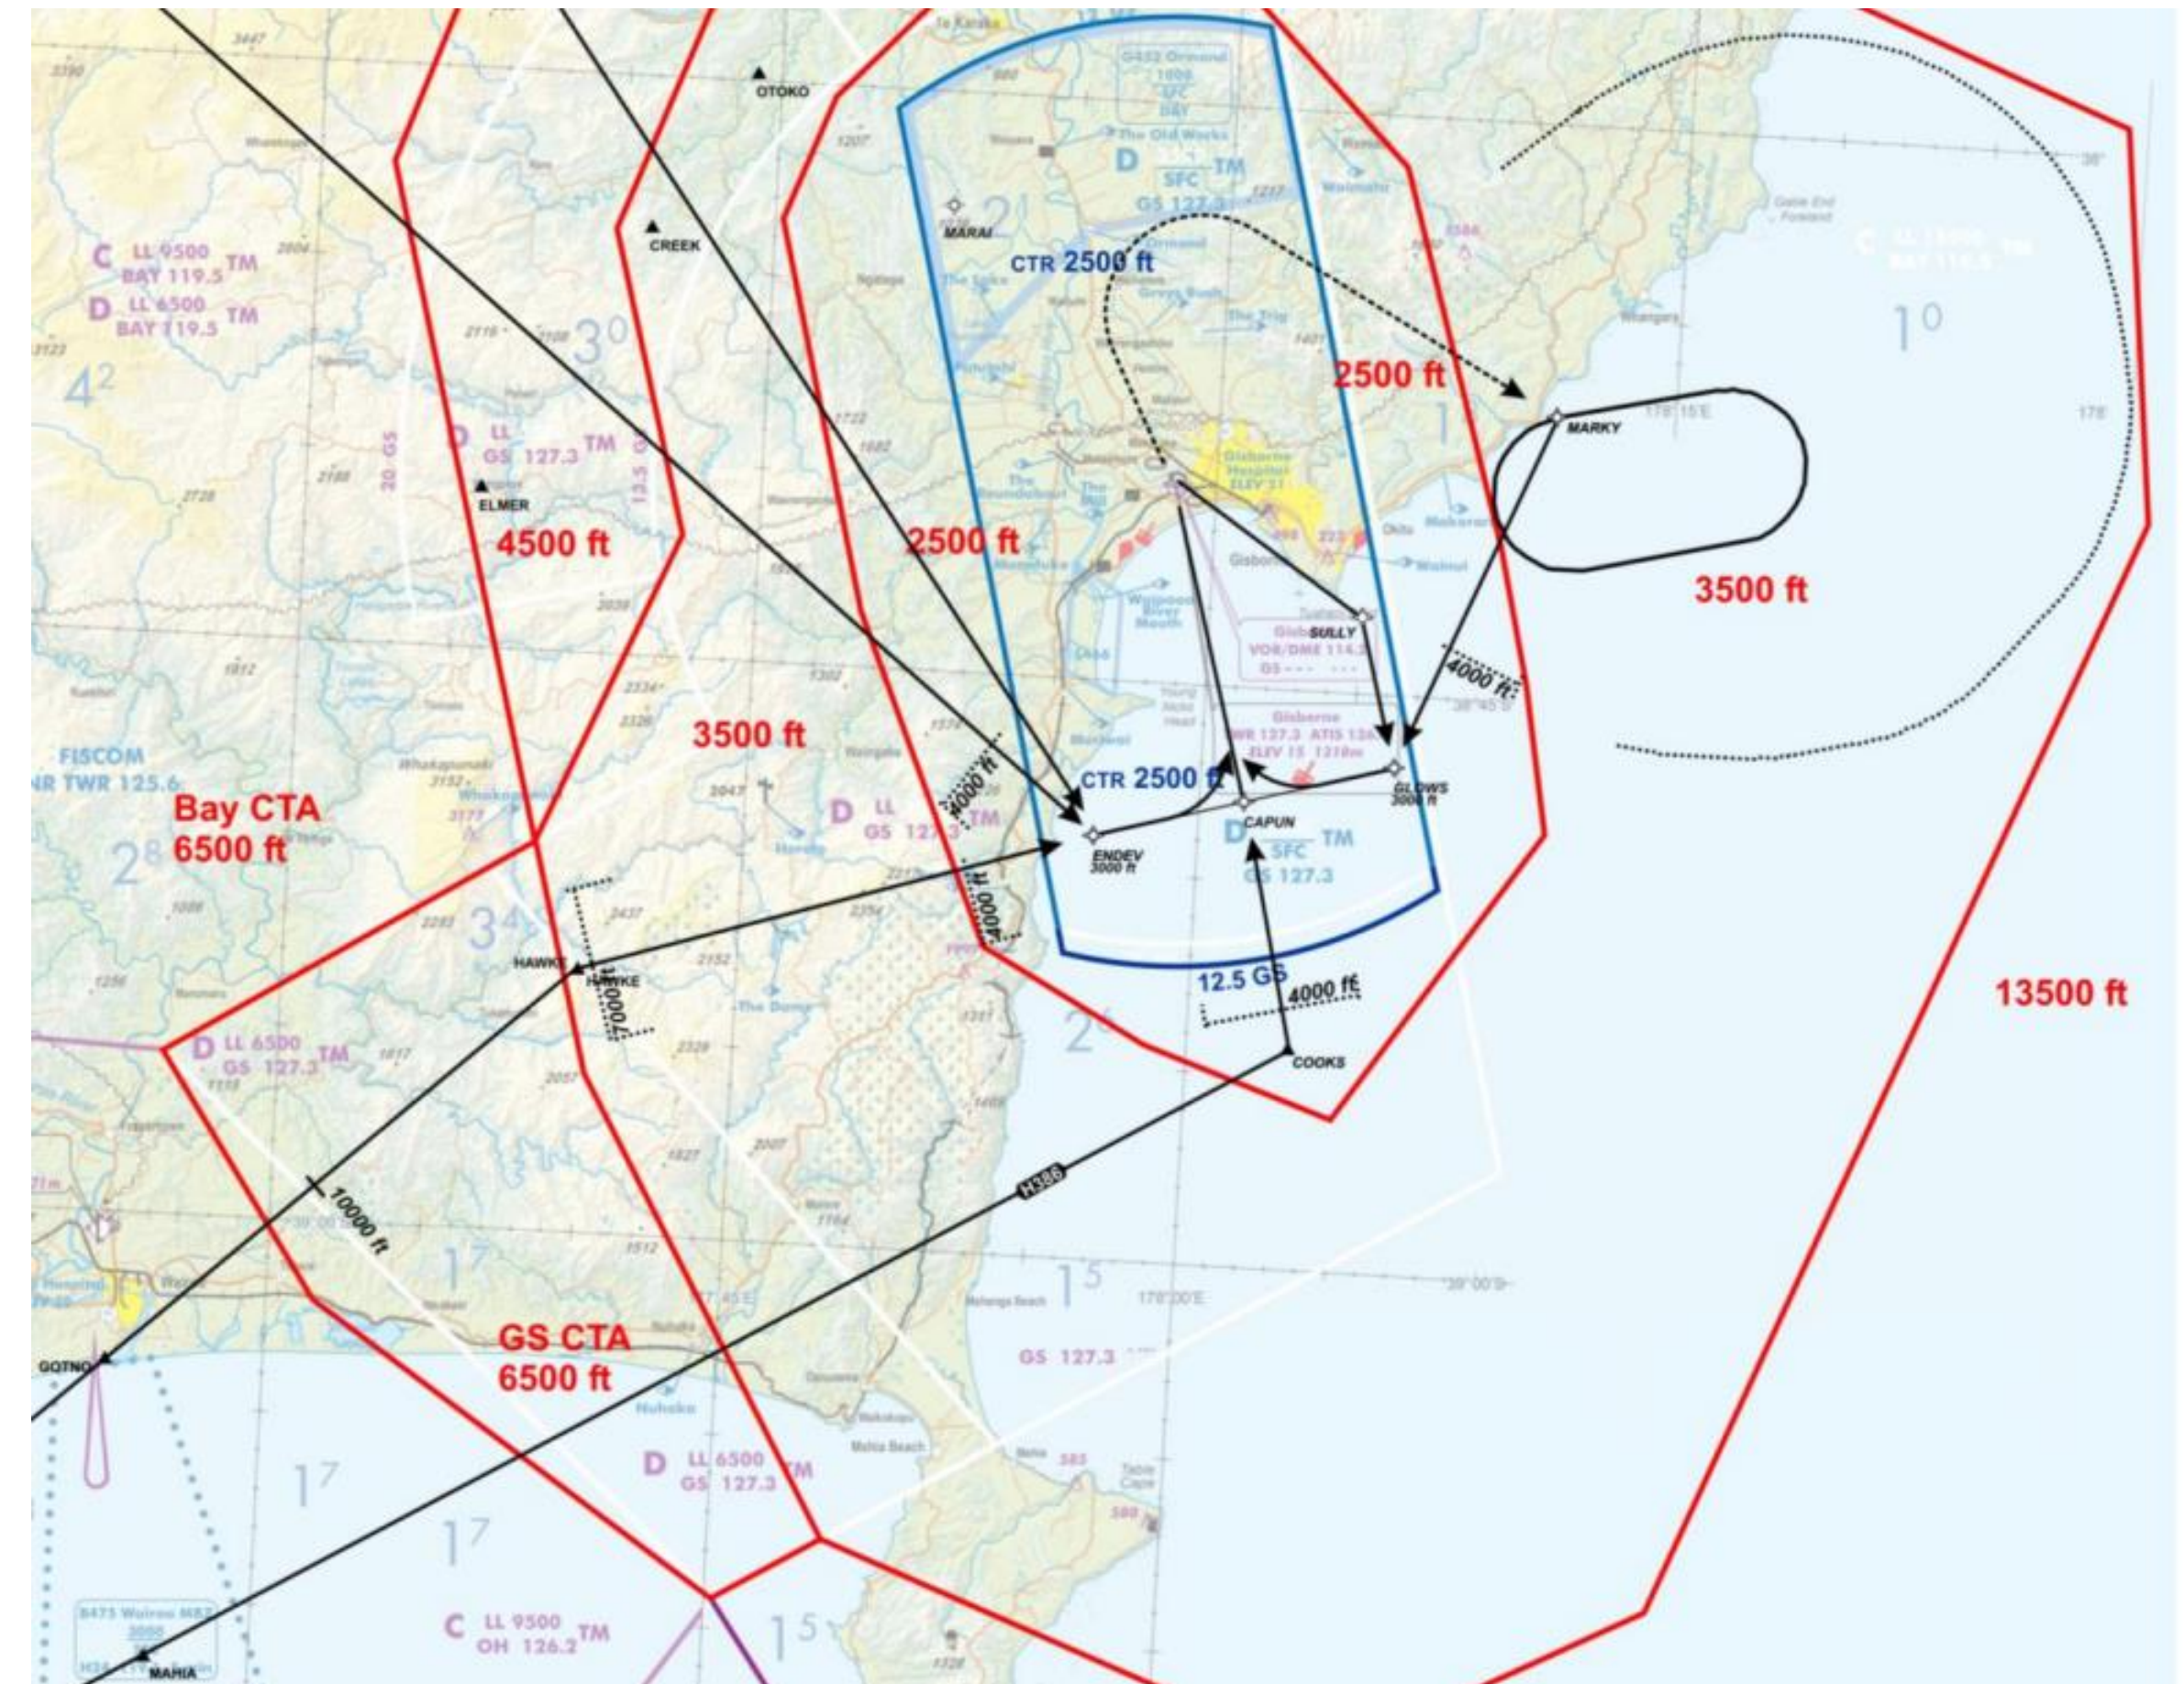

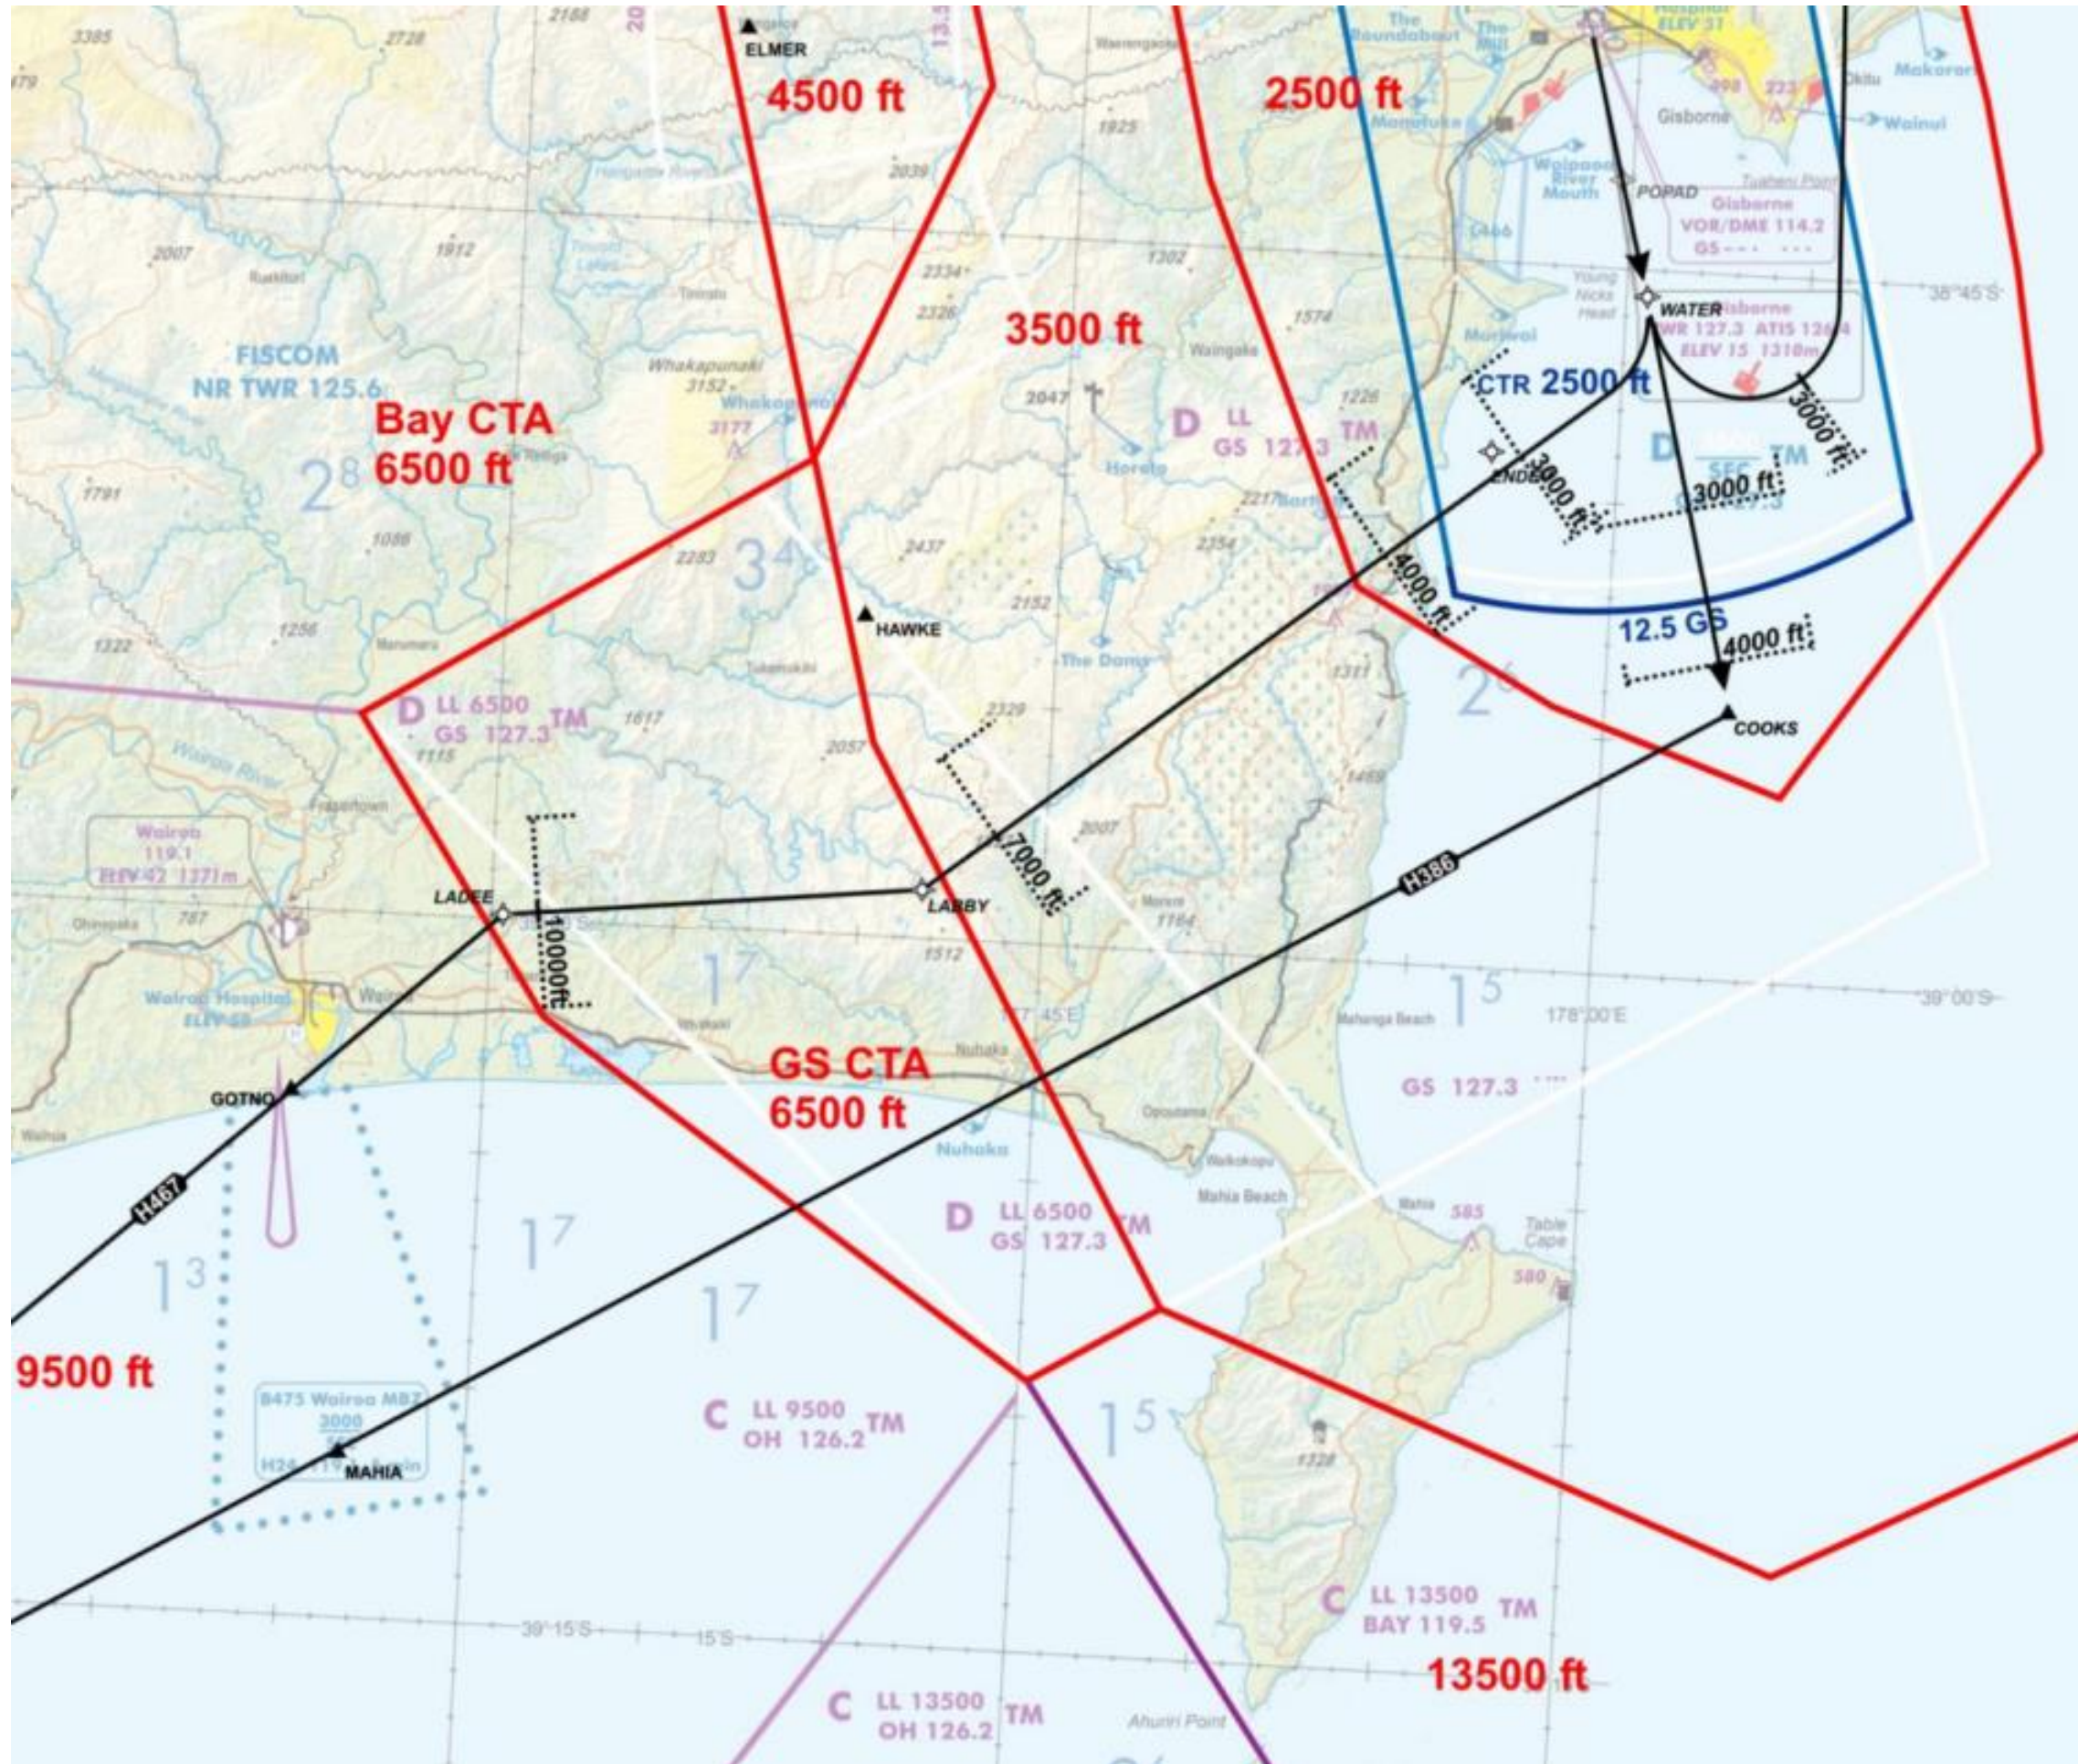

- Airways will make a submission to CAA following the consultation meetings
- Submission based on full containment of both existing and new IFPs
- Version 4 includes amendments following previous consultation in 2016-2018

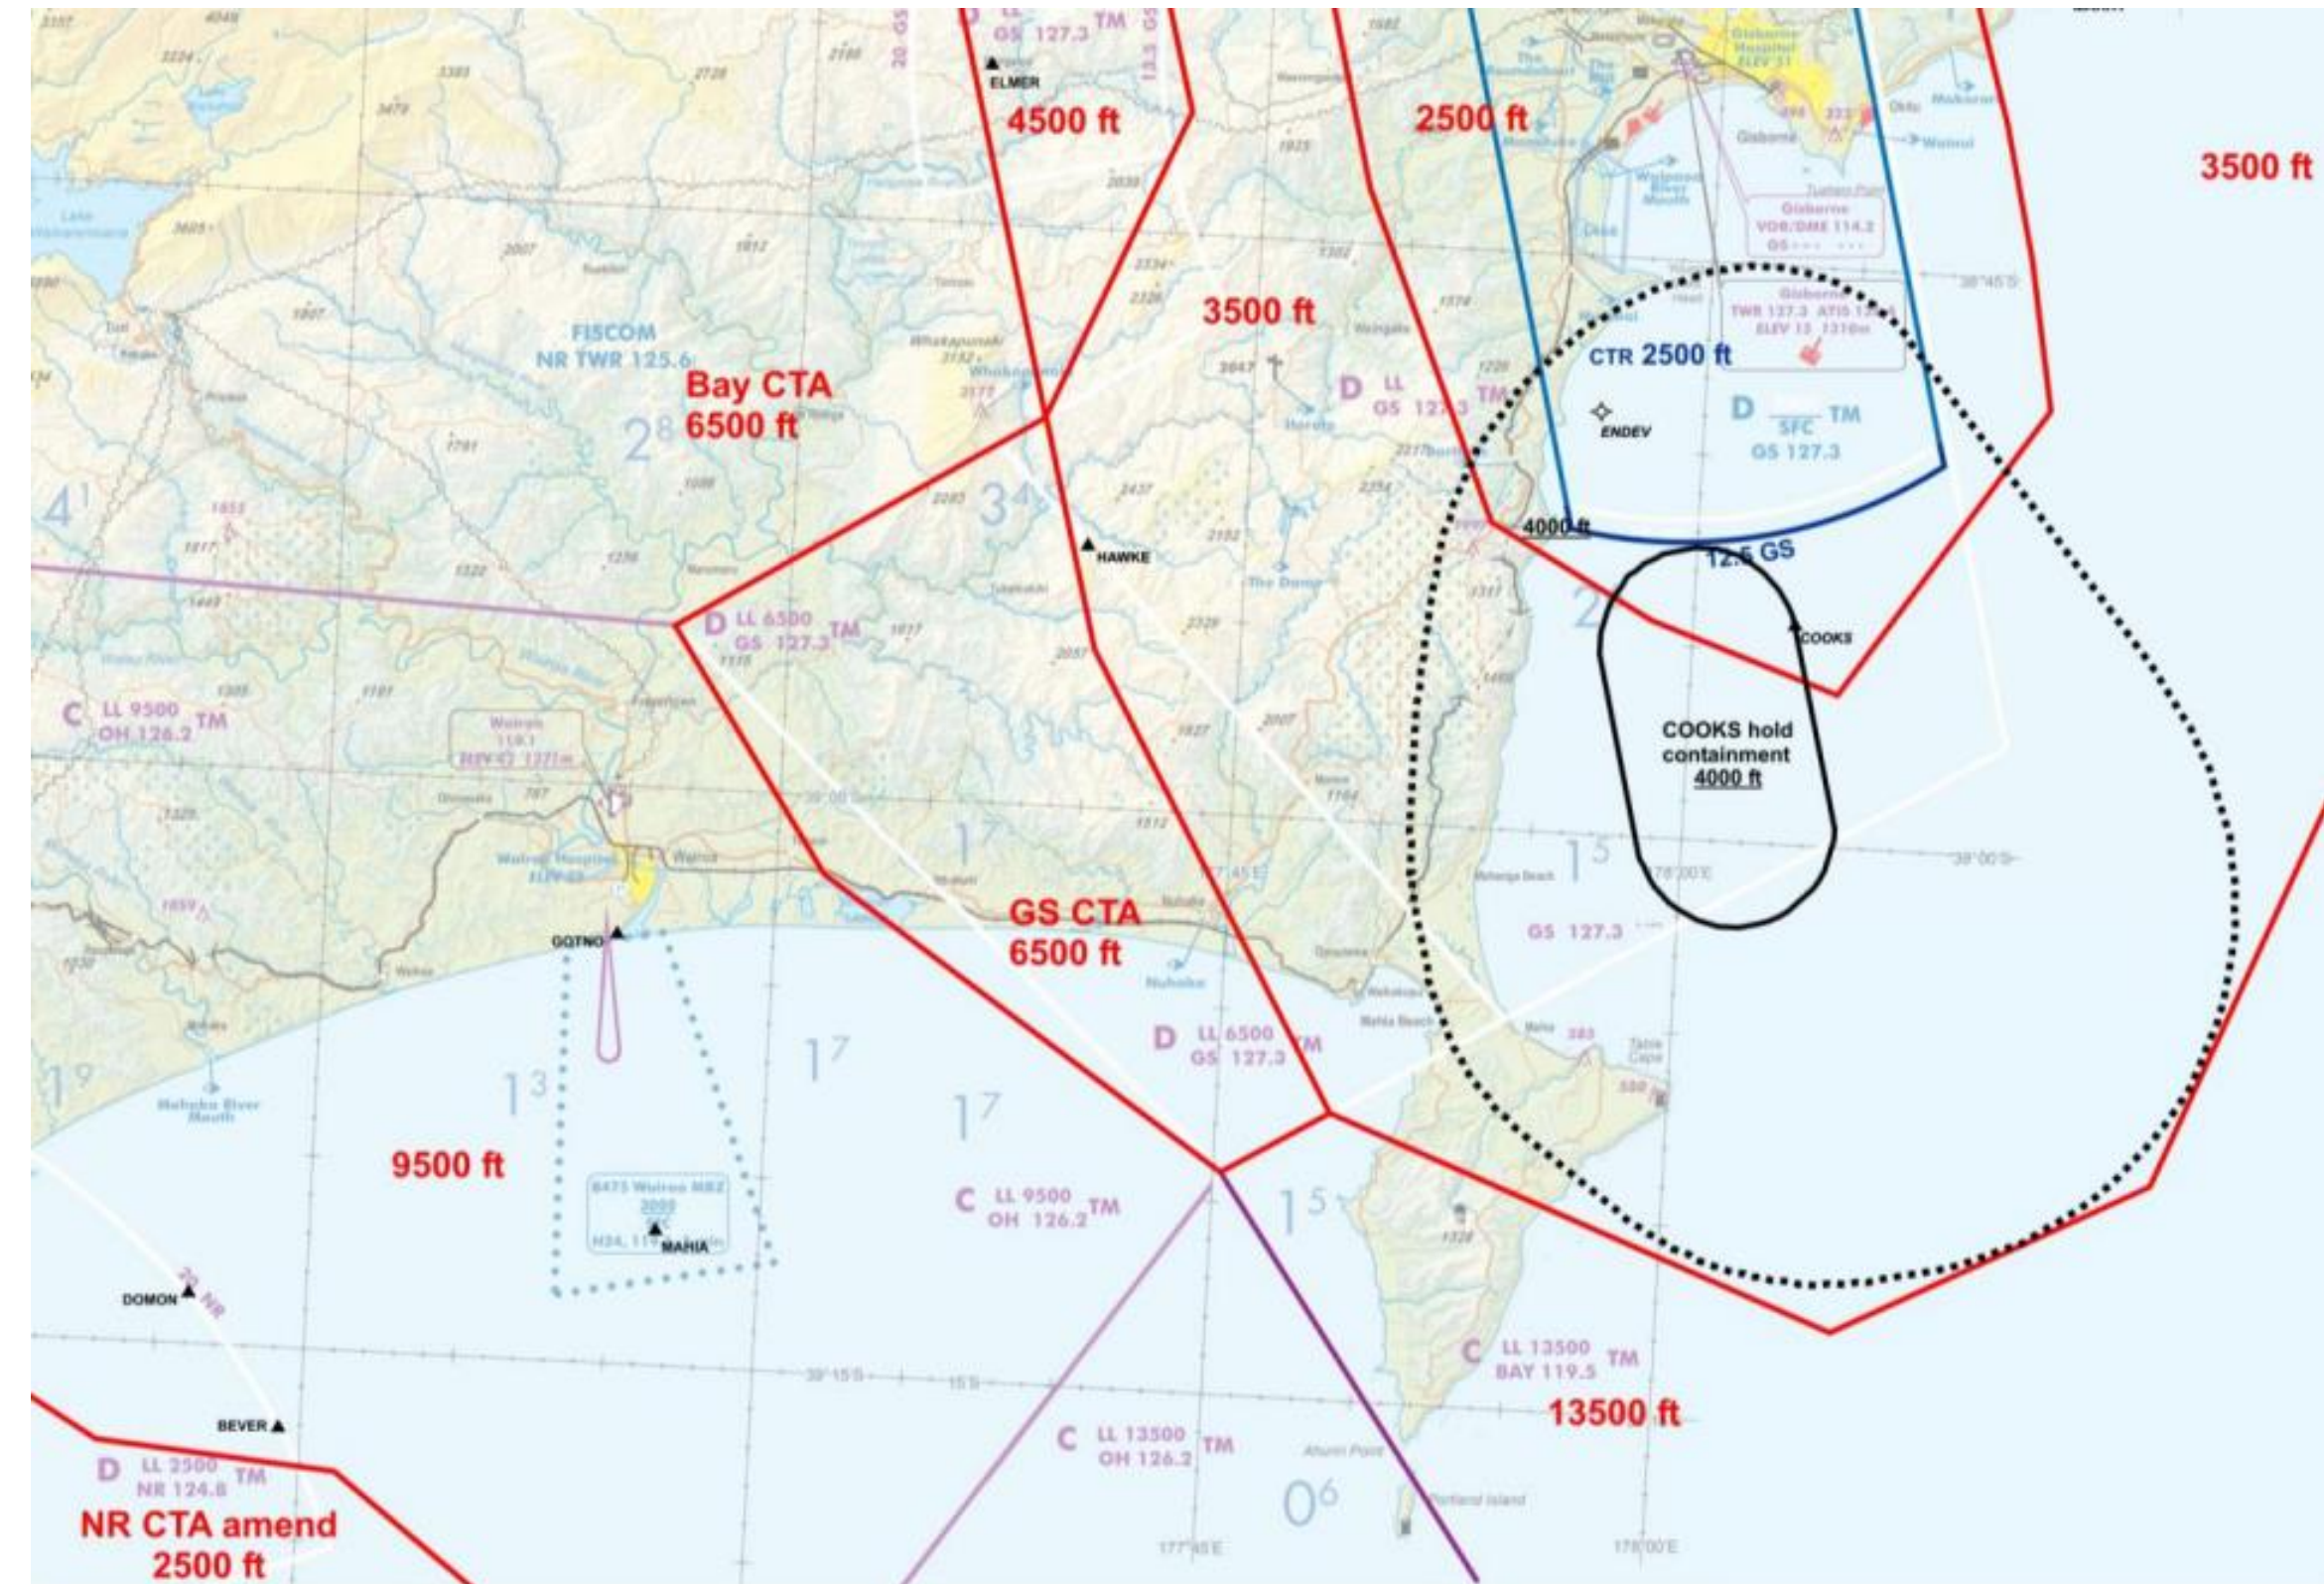

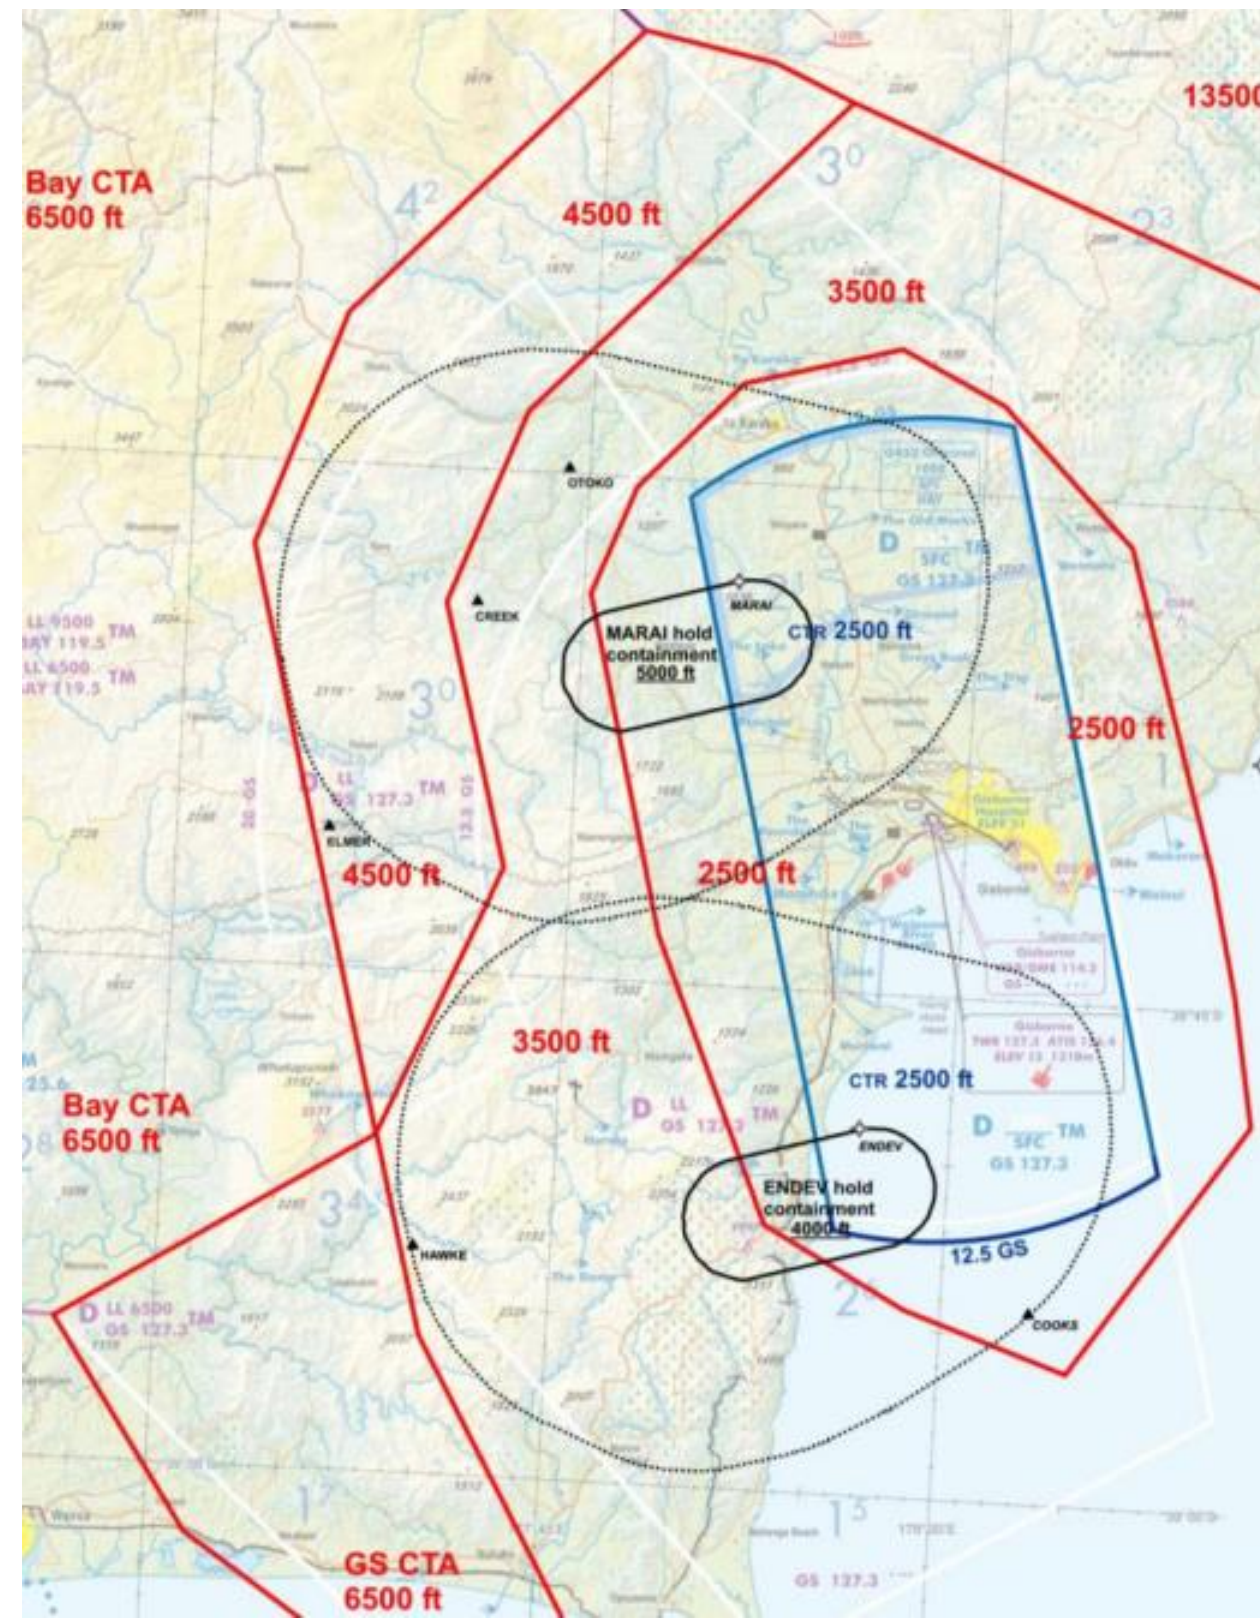

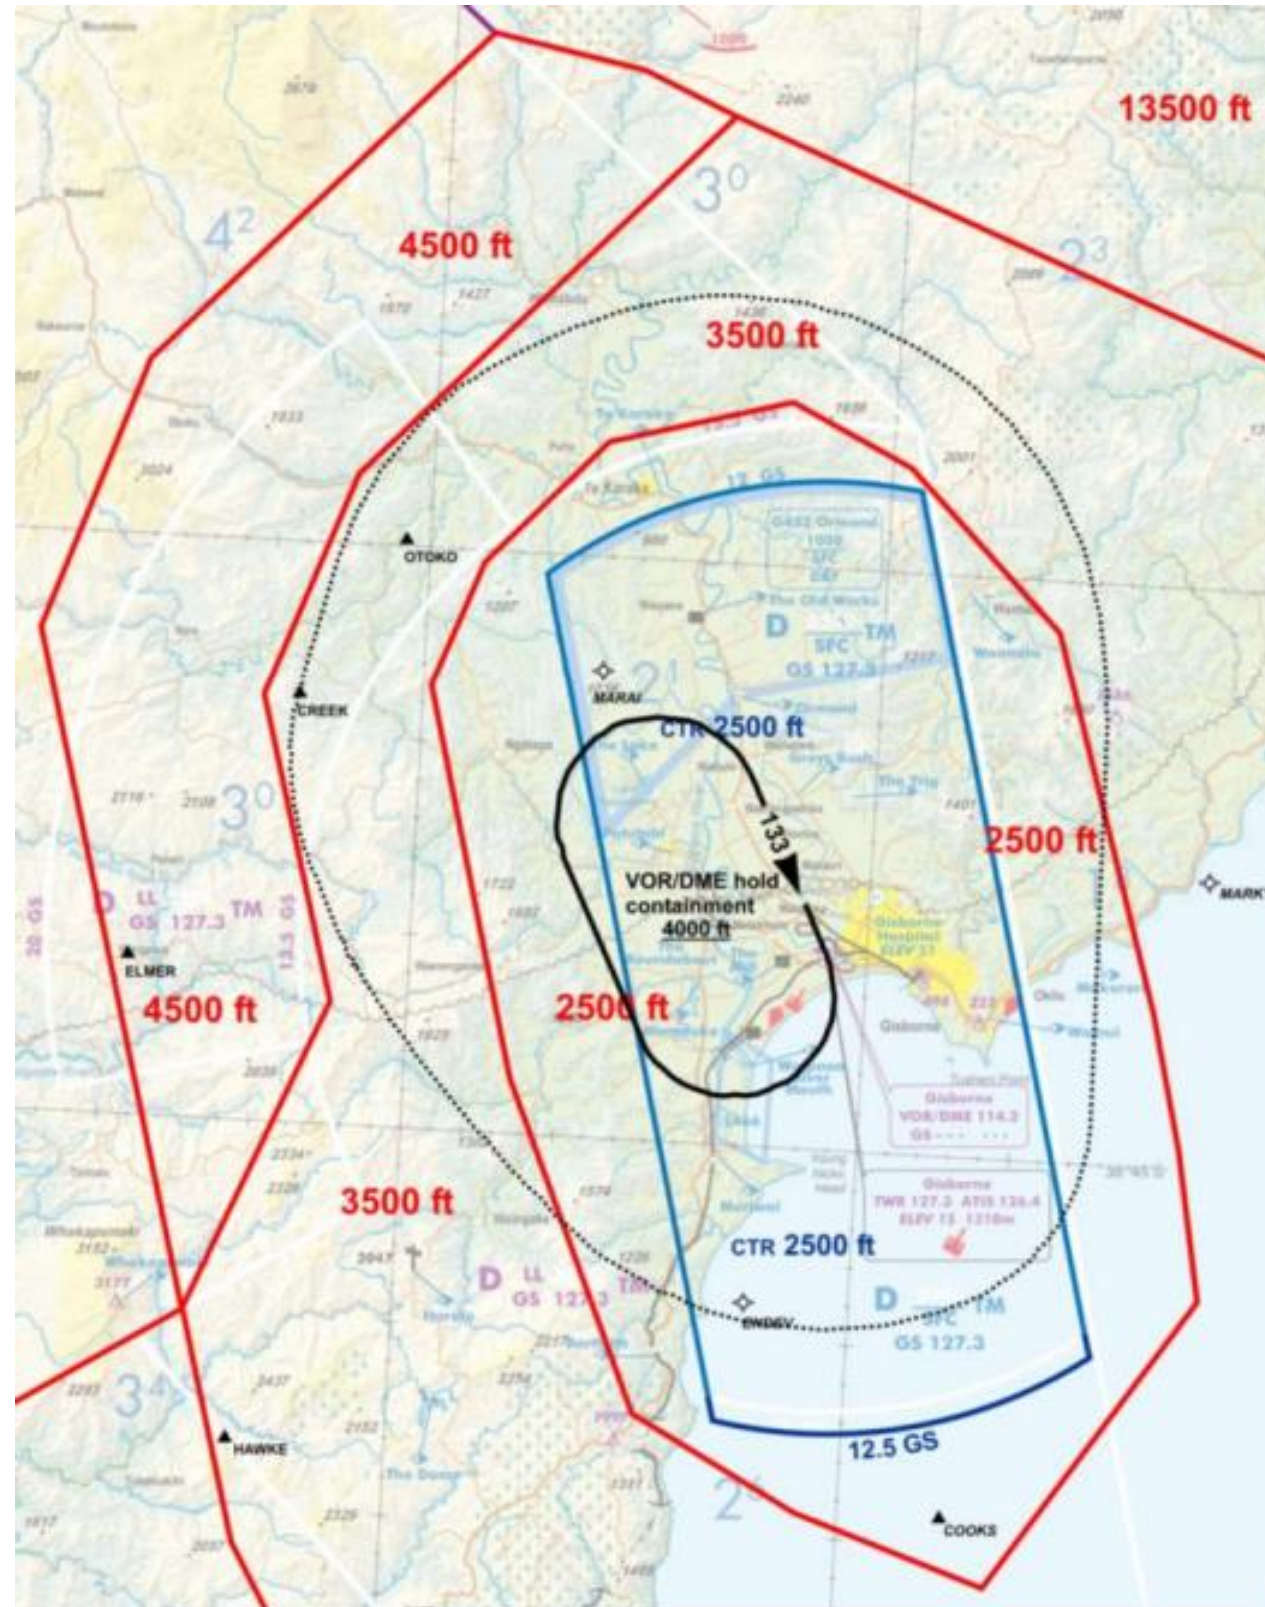

# Hawke's Bay PBN – Gisborne Airspace

# Hawke's Bay PBN – Gisborne Airspace

# Hawke's Bay PBN – Gisborne Airspace

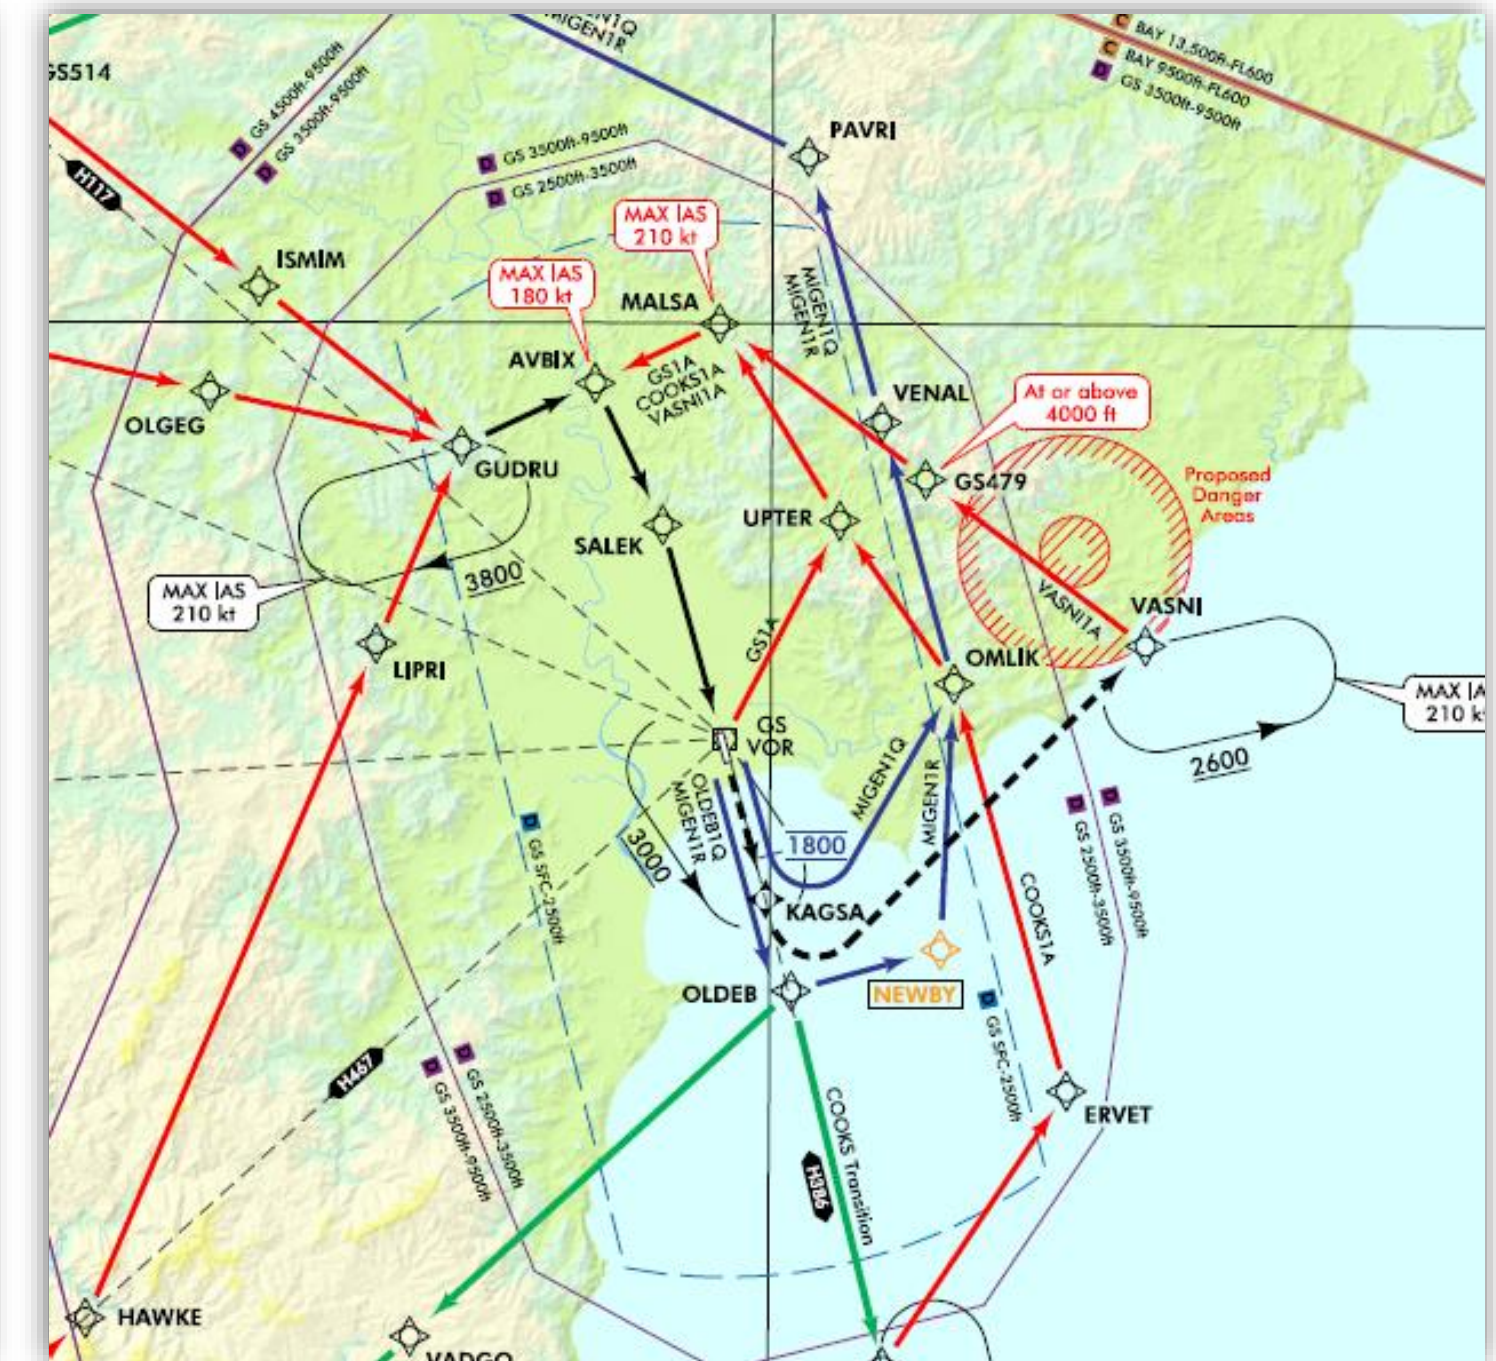

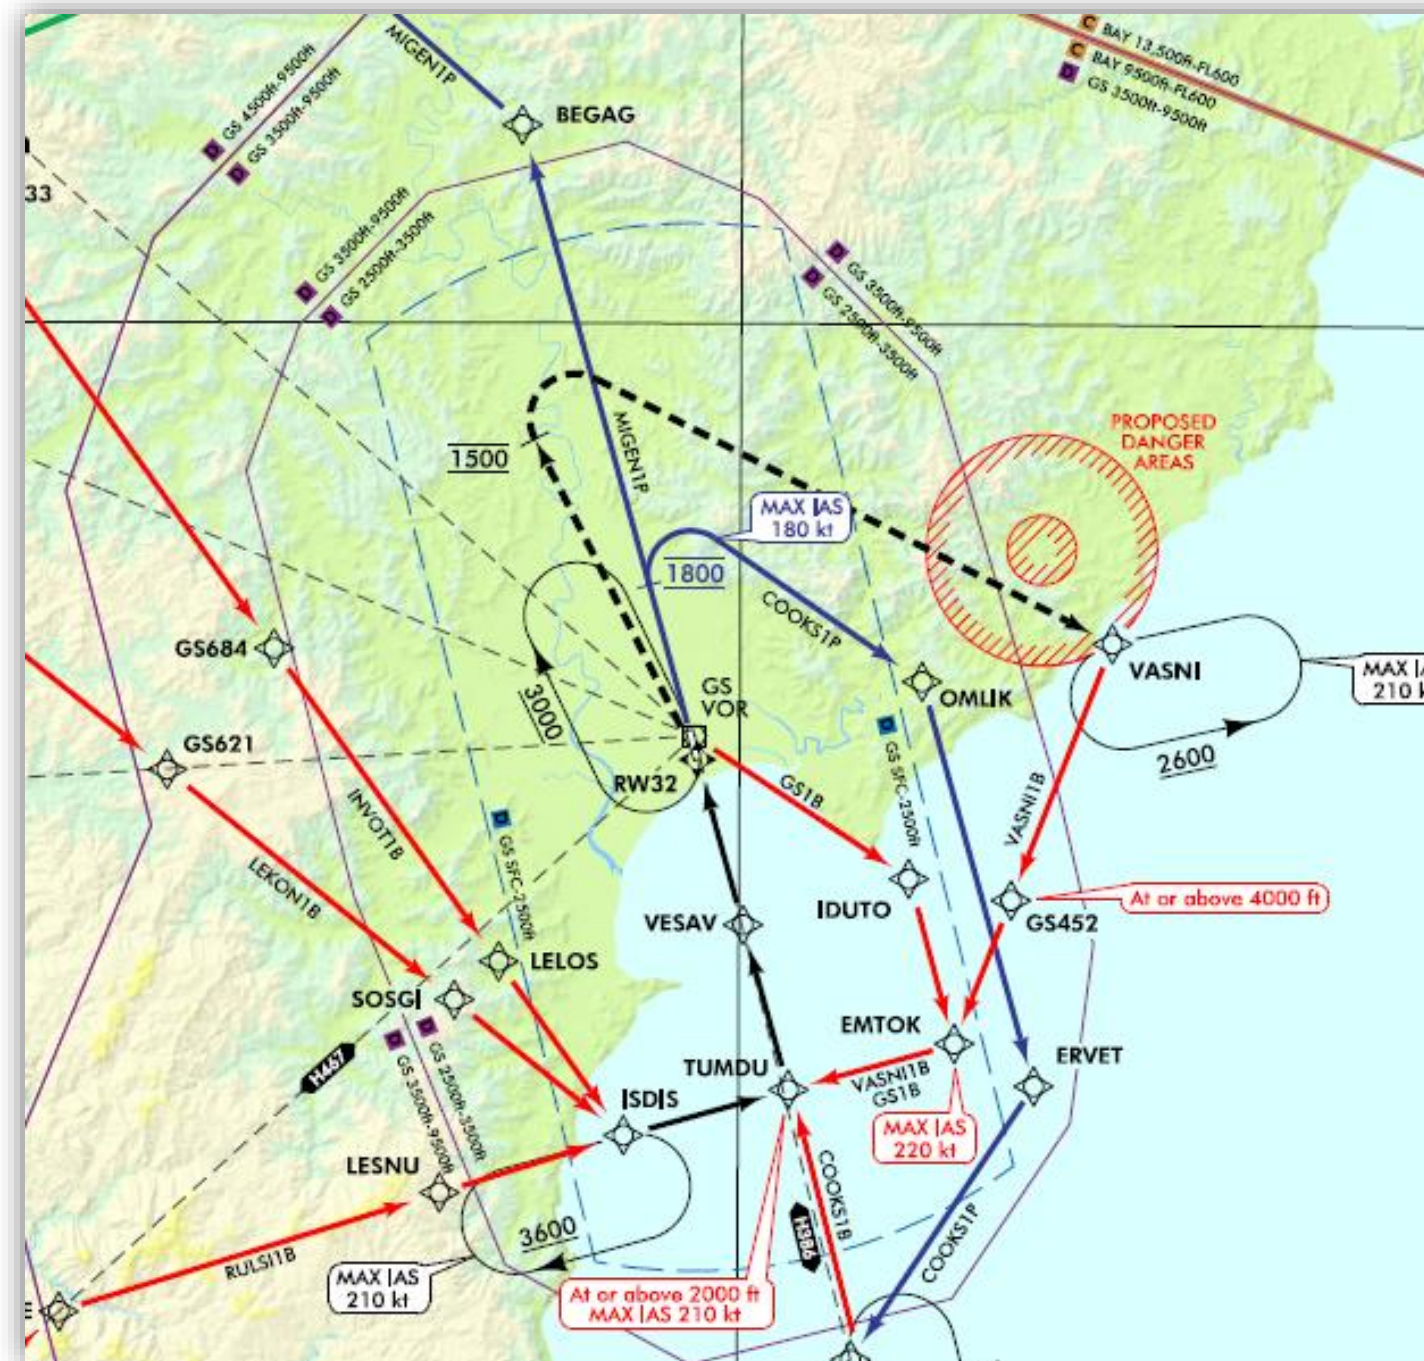

# Hawke's Bay PBN – Vortex Power Systems

- Current VPS proposal only affects airspace above A135 (Bay Approach)
- Gisborne Tower unaffected

- Following PBN implementation and airspace review (if accepted), VPS proposal would conflict with new IFPs, in particular the missed approaches for the new RNP approaches.
- Gisborne Tower impacted and will need to manage the airspace.

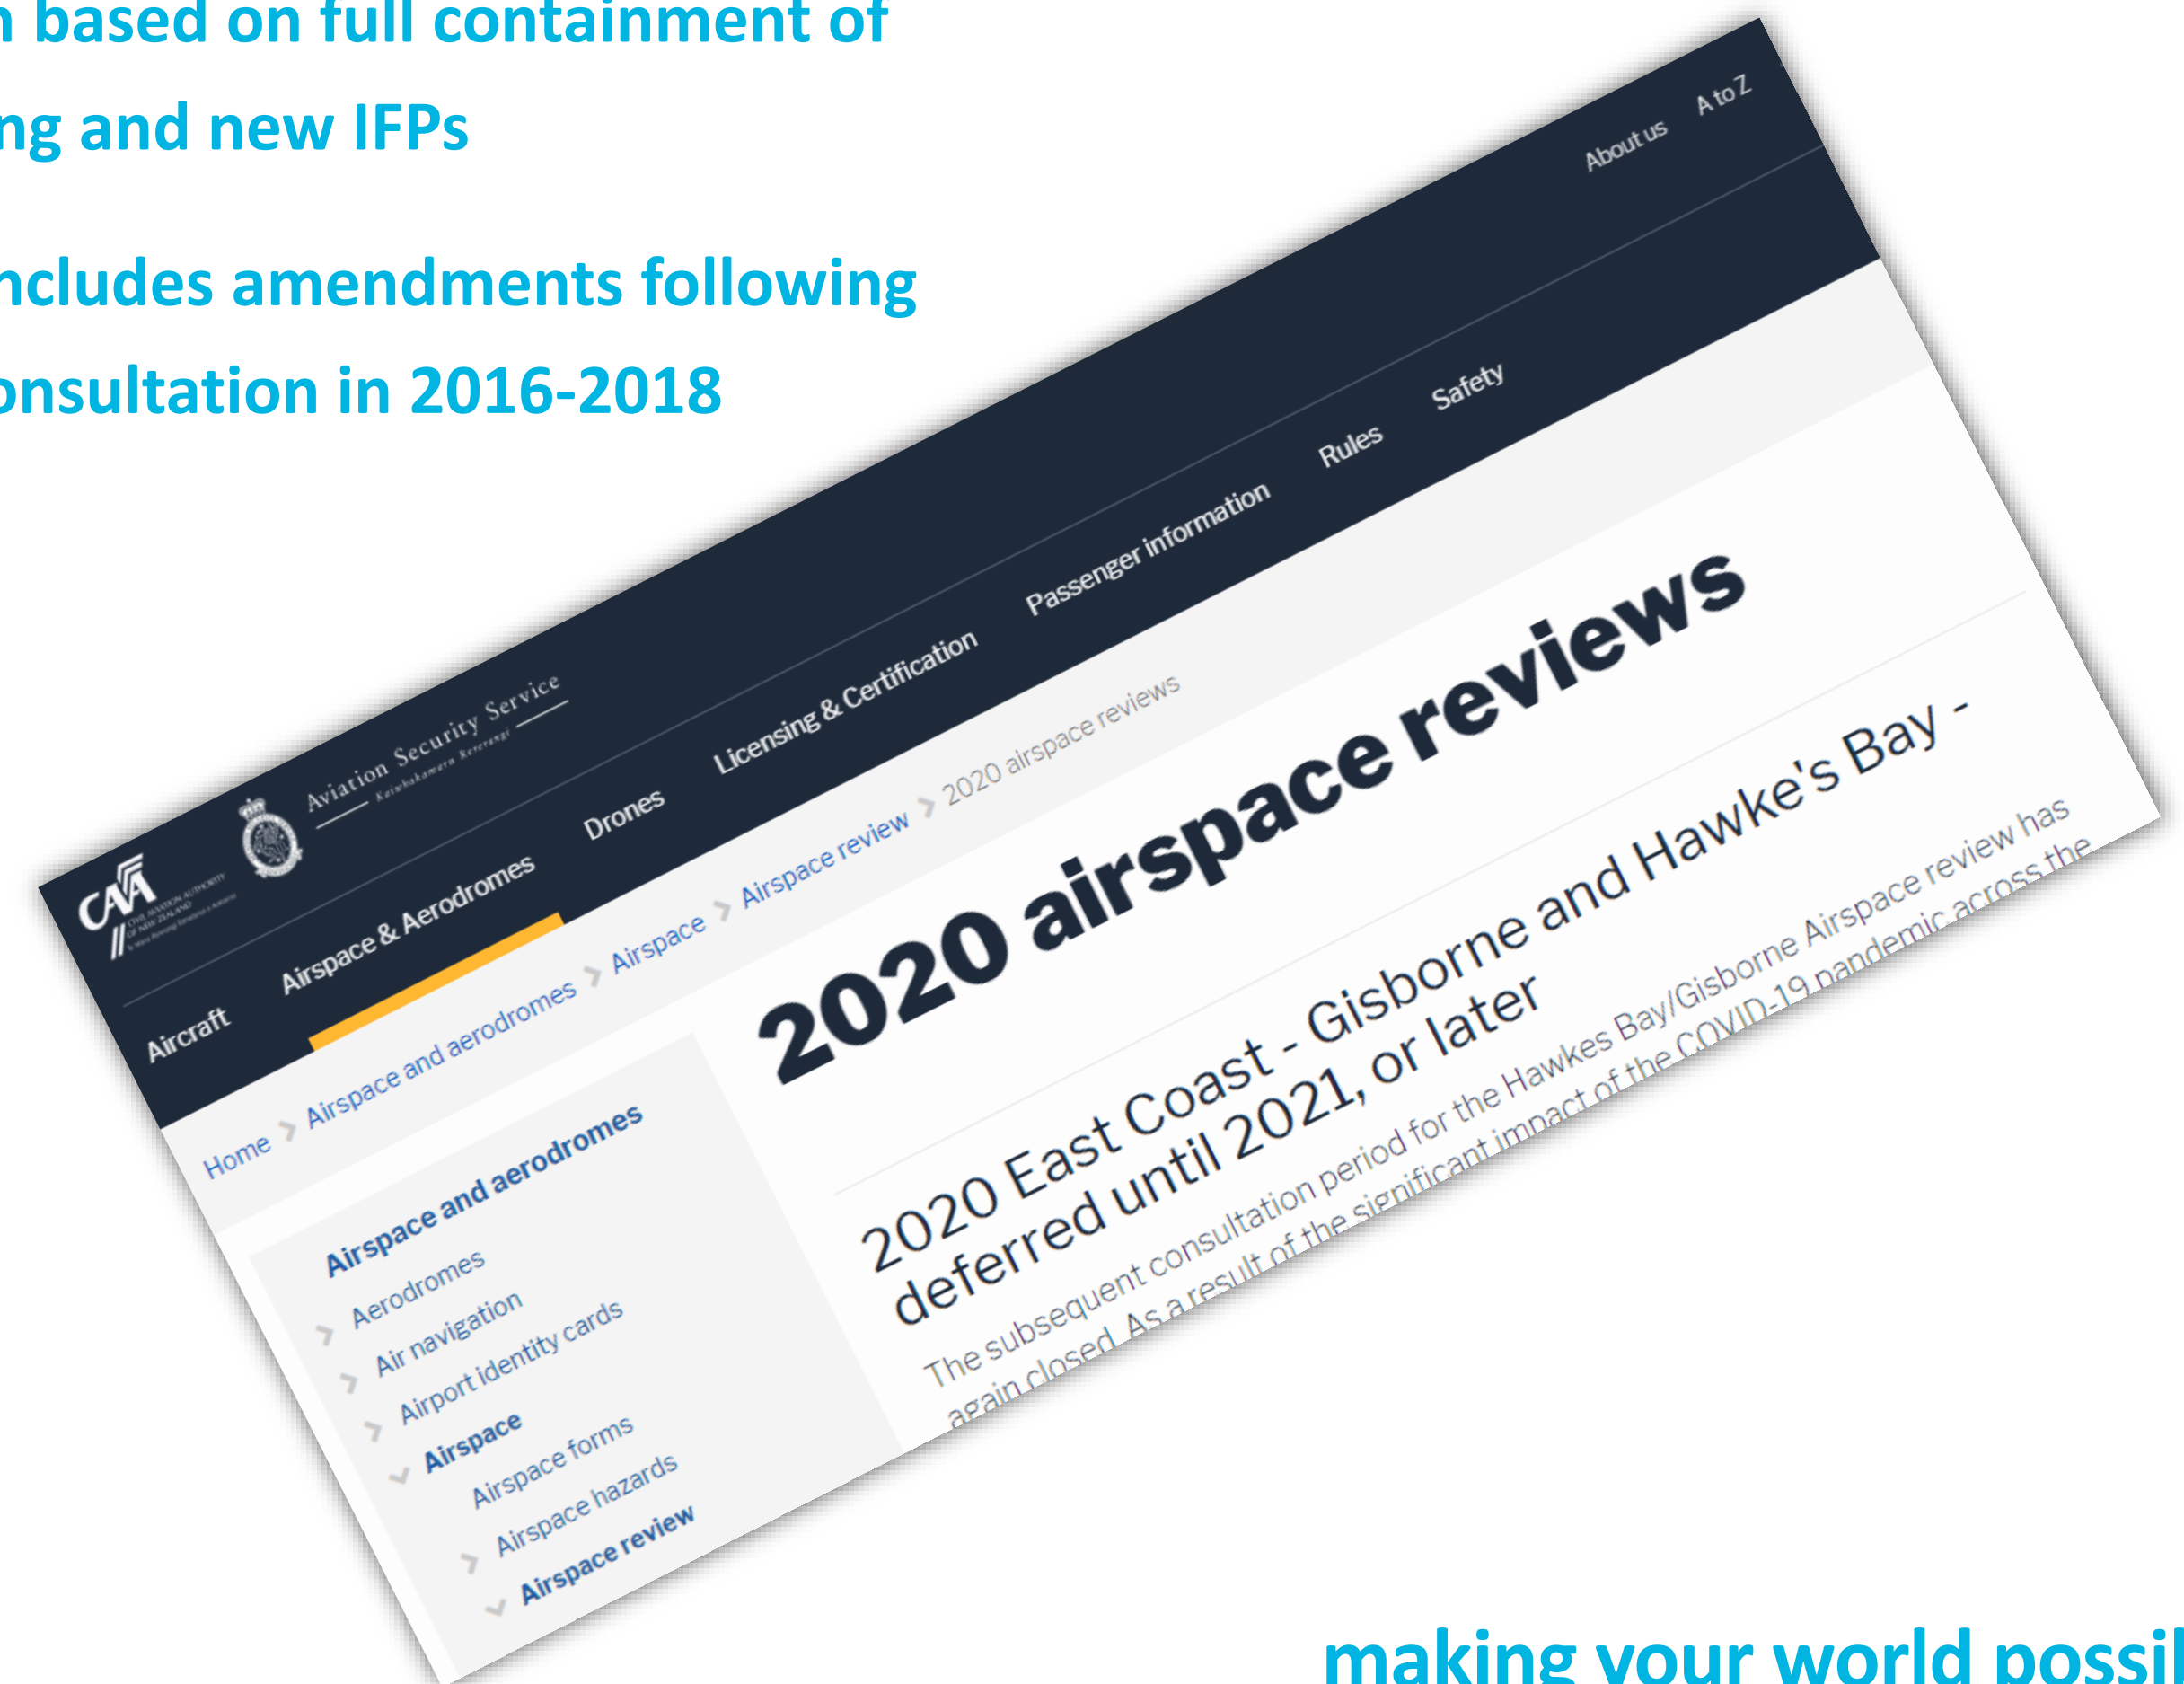

# Hawke's Bay PBN – Napier Airspace

NR Airspace Amend v5 25 November 2018

- Airways will make a submission to CAA following the consultation meetings
- Submission based on full containment of both existing and new IFPs
- Version 5 includes amendments following previous consultation in 2016-2018

# Hawke's Bay PBN – Timeline

## PBN TIMELINE 2022/23

- **Dec 22 (latest)**      **Airways Airspace Submission made to CAA**
- **Feb – Apr 23**      **CAA Airspace Consultation**
- **11 May 23**      **VNC Chart Cutoff** (final date for any CAA airspace decision)
- **24 Jul 23**      **ENRC Cutoff** (final date for any route changes)
- **31 Aug 23**      **AIRAC Publishing Cutoff** (final date for any changes to AIP pages)
- **30 Nov 23**      **Implementation date**
